

7.1.10 Report on the student attributes facilitated by the Institution

The overriding objective of education is the all-round development of a student's personality with a holistic perspective concerned with the development of every student's intellectual, emotional, social, physical, artistic, creative and spiritual potentials. It seeks to engage students in the teaching/learning process and encourages personal and collective responsibility so that they bloom in their all aspects.

To foster all round development of a student, there is a need to strike a balance between syllabi-curriculum, co-curricular and extracurricular activities. Co-curricular activities give the students an opportunity to develop particular skills and exhibit their non-academic abilities. Extracurricular activities offer the students an opportunity to work with others and gain sense of working culture of togetherness. There are various types of extracurricular activities conducted in the university, which offer students, an opportunity to work with others and to gain essential life skills. Though numerous extracurricular activities exist, the following activities are more prominently conducted in our university:
