A Brief Abstract of the Event (Maximum 500 Words):

Qualitative research is considered as one of the popular approaches of research in social sciences, yet it seems difficult for many to choose an appropriate qualitative technique to pursue the research work. Therefore, a need is felt to acquaint the social science researchers with the scientific foundations and interdisciplinary standards of qualitative research. The workshop will also try to focus on the qualitative data analysis technique using specific data analysis softwares.

Keeping the above fact in mind a workshop on the different issues related to qualitative research methodology was organized in which the renowned resource persons delivered their valuable inputs on different issues related to qualitative research approach. The main topics on which the participants gained insight were the hermeneutics philosophy, focused group discussions, content analysis, data collection and analysis in a qualitative research, mixed method approach and ethics in qualitative research.
