The GATE 2019 score is calculated using the formula

$$GATE\ Score = S_x + (S_y - S_x) \left(\frac{M - M_y}{M_x - M_y} \right)$$

where:

- M is the marks obtained by the candidate in the paper, mentioned on this GATE 2019 scorecard
- M_x is the qualifying marks for general category candidate in the paper
- M_y is the mean of marks of top 1% of the 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)
- S_x = 200, is the score assigned to M_x
- S_y = 100, is the score assigned to M_y

In the GATE 2019 score formula, M_x is 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2019 does not guarantee either an admission to a post-graduate program or a scholarship/studentship. Admitting institutes may conduct further tests and interviews for final selection.
