The GATE 2019 score is calculated using the formula

$$GATE\ Score = S_p + (S_c - S_p) \frac{(M - M_q)}{(M_q - M_q)}$$

where,

- M is the marks obtained by the candidate in the paper, mentioned on this GATE 2019 scorecard
- M_q is the qualifying marks for general category candidates in the paper
- M_c is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)
- S_p = 350, in the score assigned to it
- S_c = 900, in the score assigned to it

In the GATE 2019 score formula, M_q is 25 marks (out of 100) or $p + 7$, whichever is greater. Here p is the mean and s is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2019 does not guarantee either an admission to a postgraduate program or a scholarship/stipendship. Admitting institutes may conduct further tests and interviews for final selection.
