*Applicable only to multi-session papers.
 *Candidate's score should be greater than or equal to the marks assigned in a particular session for the corresponding category. For the category with the lowest marks assigned, if a candidate's score is less than the marks assigned, the score assigned to that candidate is the score assigned to that category.

Paper Programme: [Computer Science and Information Technology](#)

The GATE 2019 score is calculated using the formula:

$$GATE\ Score = M_z + (S_1 - S_2) \frac{(M - M_z)}{(M_1 - M_2)}$$
Where,
 M is the marks obtained by the candidate in the paper, mentioned on the GATE 2019 scorecard
 M_z is the qualifying marks for general category candidates in the paper
 M₁ is the mean of marks of top 0.1% or top 10% (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)
 S₁ = 200, is the score assigned to top 0.1% or 10%, as the score assigned to M₁
 In the GATE 2019 score format, M_z is 25 (marks out of 100) or 1/4th of M₁, whichever is greater. Here μ is the mean and z is the standard deviation of marks of all the candidates who appeared in the paper.
 Qualifying in GATE 2019 does not guarantee either an admission to a post-graduate program or a scholarship/stipendship. Admitting institutions may conduct further tests and interviews for final selection.
