The GATE 2019 score is calculated using the formula:

$$GATE\ Score = S_p + (S_t - S_p) \left( \frac{M - M_q}{M_t - M_q} \right)$$

where:

- M is the marks obtained by the candidate in the paper mentioned on this GATE 2019 scorecard
- M<sub>q</sub> is the qualifying marks for general category candidates in the paper
- M<sub>t</sub> is the mean of marks of top 0.1% or top 10 candidates (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)
- S<sub>p</sub> = 205, is the score assigned to M<sub>q</sub>
- S<sub>t</sub> = 500, is the score assigned to M<sub>t</sub>

In the GATE 2019 score format, M<sub>q</sub> is 205 marks (out of 100) if p = 0 or whichever is greater, here p is the mean and s is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2019 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Admitting institutes may conduct further tests and interviews for final selection.
