27-10-2021	One day webinar	<ol style="list-style-type: none"> 1. Prof. Mohammad Muzammil 2. Prof. Kanhaiya Ahuja 3. Prof. Neena Pandey 	91

A Brief Abstract of the Event (Maximum 500 Words):

The pandemic has wreaked havoc on India, notably during the virus's second wave in the spring of 2021. The significant reduction in GDP is the largest in the Indian history. COVID-19's rapid proliferation has put human lives in danger, disrupted livelihoods, and harmed trade, the economy, and enterprises all around the world. Despite the fact that all countries have faced challenges as a result of Covid-19, India has faced a particularly difficult situation due to its large population, inadequate health facilities, high poverty rates, low socio-economic conditions, poor social protection systems, limited access to water and sanitation, and insufficient living space, which has made it necessary to maintain physical distance and take other measures. India has implemented strict lockdowns to prevent the virus from spreading, affecting the lives and livelihoods of millions of people in the region. COVID-19 is likely to affect economic growth, increase fiscal deficits and monetary burdens, increase macroeconomic instability risks and result in dwindling micro-small and medium industries and informal businesses, according to the analysis. This will very certainly increase poverty, unemployment, and the likelihood of hunger and food insecurity. If not adequately addressed, this could exacerbate existing disparities, disrupt social cohesion, and raise stress and volatility. Disruption of the every ones normal life, social distancing, isolation, job loss, travel restrictions, school closure, medical emergencies, massive mobilization of migrant workers to their native place, negligence of other medical problems leading to non COVID medical deaths, food shortage, black marketing and many more are the common impacts of COVID-19. As a result, the economic and social repercussions of the COVID-19 pandemic in India are anticipated to be significant and long-lasting. In the light of the above, this Webinar discusses Covid-19's current and potential consequences and problems on major social and economic sectors such as India's income, consumption, poverty, unemployment, and rural livelihoods
