**A Brief Abstract of the Event (Maximum 500 Words):**

A three days skill development training program from **08/09/2017 to 10/09/2017** on **Waste Paper Art Training Program** was jointly organized by Department of Rural Technology and Social Development and Skill Development Cell, GGU at Department of Rural Technology and Social Development, GGU. Waste paper art is one of the unique ways of art and craft used from a very longer time. In Waste paper art and crafts products are made using waste papers or newspapers by cutting, folding and pasting them together to prepare various 3-Dimensional structures. Raw materials required for making them are waste papers, scissors, glue etc. It is very easier and neater to work with the papers than to work with the colors, paints and dyes. Mr. Sanjeev Bhagat was the coordinator as well as one of the master trainers of this training program. Participants prepared various useful products like hanging decorative jhoomar, pen stand, small basket etc.
