We are leaving in a VUCA world

VUCA is an acronym – first used in 1987, drawing on the leadership theories of Warren Bennis and Burt Nanus – to describe or to reflect on the **volatility, uncertainty, complexity and ambiguity** of general conditions and situations; The U.S. Army War College introduced the concept of VUCA to describe the more volatile, uncertain, complex and ambiguous multilateral world perceived as resulting from the end of the **Cold War**.
