Day plan:-

To visit the auditorium of our university.

Work done:-

To see/know the people who are distracted from their track and how to carry them out.

Activities Carried out:-

People are distracted from their goals & are involved in many wrong situations or cases. As a social worker I observe there are many people who get arrested by the & social problems or issues. or they lose their concentration in their age of making life better.

The first requisite for success is to develop the ability to focus and apply your mental and physical energies to the problems at hand without growing weary.

People think focus means saying 'yes' to anything you've got to focus on. But that's not what it means at all. It means saying 'no' to the hundred good things or ideas that they are you have to pick.

*Suman Toppal*

Carefully.

what happens to us doesn't determine  
our success. How we spend our choices  
is what shapes our destiny.

Technique and method used :-

- Active listening
- Data collection / observation

Observation :-

In Indian Society, the youth has been  
detected. Many youngsters are indulged in  
many cases, like gambling, drug addiction,  
gaming etc. They were attracted from  
their path. Here to motivate them to  
focus on their career. This is the subject  
axis the main point of our programme.  
The topic was valuable for me and Ethic.
