"FinTech" an abbreviation for "Financial Technology" refers to application of technology in solving financial problems. Though, interlinkage of finance and technology has a long history, a new era of fintech has evolved since 2008 challenging the existing financial services sector world wide. Growth of Crowd funding, Cryptocurrencies and block chains have not only provided new and quick solutions in finance solution, but they also pose serious threats for policy makers and regulators. This webinar discusses the status of Fintech in India and its future, with a focus on creating awareness ,encouraging innovation and research and exploring career opportunities in this emerging field.
