

1.1.2

List of Employability/ Entrepreneurship/ Skill Development Courses with Course Contents

Colour Codes		
Employability Contents	Green	
Entrepreneurship Contents	Light Blue	
Skill Development Contents	Pink	
Name of the Subjects/Related to all three Components (Employability/ Entrepreneurship/ Skill Development)	Yellow	

**List of Courses Focus on Employability/ Entrepreneurship/
Skill Development**

Department : Department of Forestry, Wildlife and Environmental Sciences

Programme Name : B. Sc. (Forestry)

Academic Year : 2019-20

List of Courses Focus on Employability/ Entrepreneurship/Skill Development

Sr. No.	Course Code	Name of the Course
1.	NR/FR/CR/01/01/L	Principles and Practices of Silviculture
2.	NR/FR/CR/01/02/L	Fundamentals of Soil Science
3.	NR/FR/GE/01/01/L	Basic Mathematics
4.	NR/FR/CC/01/L	English Communication
5.	NR/FR/EC/01/01/P	ECA-Extracurricular activity Field visit/ NSS/ Swachhta/ Physical Education/ Plantation Activities
6.	NR/FR/CR/02/03/L	Forest Ecology and Biodiversity Conservation
7.	NR/FR/CR/02/04/L	Fundamentals of Wildlife
8.	NR/FR/GE/02/02/L	Introductory Botany
9.	NR/FR/CC/02/02/L	Environmental Studies
10.	NR/FR/EC/02/02/P	ECA-Extracurricular activity Field visit/ NSS/ Swachhta/ Physical Education/ Plantation Activities
11.	NR/FR/CR/03/05/L	Forest Mensuration
12.	NR/FR/CR/03/06/L	Cytogenetics and Plant Breeding
13.	NR/FR/CR/03/07/L	Forest Management
14.	NR/FR/GE/03/03/L	Ethnoforestry
15.	NR/FR/SC/03/01/L	Nursery Practices and Plantation Management
16.	NR/FR/CR/04/08/L	Application of Remote Sensing and GIS in Forest and Watershed Management

17.	NR/FR/DS/04/1A/L	Fundamentals of Wood Science
18.	NR/FR/DS/04/1B/L	Nursery Management and Commercial Forestry
19.	NR/FR/GE/04/04/L	Non Wood Forest Products and Utilization
20.	NR/FR/SC/04/02/L	Forest Policy, Legislation & Environmental Act
21.	NR/FR/CR/05/09/L	Wildlife Management
22.	NR/FR/CR/05/10/L	World forestry Systems
23.	NR/FR/DS/05/2A/L	Wood Technology
24.	NR/FR/DS/05/2B/L	Forest Tree Seed Technology
25.	NR/FR/DS/05/3A/L	Meteorology and Crop Production
26.	NR/FR/DS/05/3B/L	Basic Concepts of Horticultural and Landscaping
27.	NR/FR/CR/06/11/L	Forest Pathology and Entomology
28.	NR/FR/CR/06/12/L	Agroforestry
29.	NR/FR/CR/06/12/P	Forest Economics
30.	NR/FR/DS/06/4B/L	Forest Tree Improvement and Biotechnology
31.	NR/FR/DS/06/5A/L	Carbon Forestry and Global Climate Change
32.	NR/FR/DS/06/5B/L	Community Forestry
33.	NR/FR/CR/07/13/L	Biostatistics
34.	NR/FR/CR/07/14/L	Forest Surveying and Engineering
35.	NR/FR/DS/07/6A/L	Fundamentals of Extension Education
36.	NR/FR/CR/08/15/P	Socio Economic Survey-Village Attachment (report writing, presentation, Viva-Voce)
37.	NR/FR/CR/08/16/P	Forest Operation Work Experience (report writing, presentation, Viva-Voce)
38.	NR/FR/CR/08/17/P	Forest Institute and Industrial Visit (report writing, presentation, Viva-Voce)

Department : Department of Forestry, Wildlife and Environmental Sciences

Programme Name : M.Sc. (Forestry and Environmental Sciences)

Academic Year : 2019-20

List of Courses Focus on Employability/ Entrepreneurship/Skill Development

1.	319 (M. Sc. Forestry and Environmental Sciences)	Silviculture
2.		Forest Biometry, Surveying & Engineering
3.		Forest Management, Remote Sensing & GIS
4.		Forest Ecology and Biodiversity Conservation
5.		Forest Protection
6.		Forest Statistics & Research Methodology
7.		Forest Policy, Laws and Environmental Legislation
8.		Forest Tree Improvement and Biotechnology
9.		Wood Technology and Nanoforestry
10.		Wildlife Biology and Conservation
11.		Forest Soil and Watershed Management
12.		Forest Products and Industries
13.		Environment and Global Climatic Changes
14.		Breeding Methods in Forest Trees
15.		Forest Trees Reproductive Biology and Seed Orchards
16.		Molecular Genetics of Forest Trees
17.		Quantitative Genetics of Forest Trees
18.		Forest Genetic Diversity, Conservation & Environmental Impact
19.		Field Training (Attachment with State Forest Department for

	analysis of FGR & its distribution) Project report writing, Presentation & Viva-voce
20.	Industrial Training
21.	Computational Skills
22.	Forest Resource Analysis
23.	Production Management in Nursery and Plantation Forestry
24.	Finance and Marketing Management of Forest Resources
25.	Tree Business Management
26.	Forest Management for Environmental Conservation
27.	Field Training (Attachment with State Forest Department for analysis of Forest Management patterns & Management techniques)

SEMESTER - I

PRINCIPLES AND PRACTICES OF SILVICULTURE

CR: 4+2

Definition, objective and scope of silviculture. Status of forest in India and their role. Forest types and their classification. Trees and their distinguishing features. Site factors and their interactions. Climatic factors and its role. Edaphic factors, Physiographic factors and its influences. Biotic factors- influence of plant insect, wild animals, man and domestic animals. Impact of controlled burning, grazing, influence of forest on vegetation. Microclimate and its effect.

Regeneration: Natural, artificial and factors affecting it. Regeneration Survey, Tending operation: Weeding, cleaning, thinning and improvement felling.

PRACTICAL

Acquaintance with various technical terms. Study of forest composition, Recording the observations on phenological characteristics of different tree species. Study of site factors. Study of the natural regeneration, afforestation and reforestation success. Lay outting of nursery bed and soil preparation, types of seed sowing in nursery bed.

Suggested Readings:

1. Khanna, L. S. (1984). Principles and Practice of Silviculture, Khanna Bhandu, Dehra Dun.
2. Ram Prakash and L.S. Khanna. (1991) Theory and Practice of Silvicultural systems. International Book Distributors, Dehra Dun.
3. Dwivedi, A.P. (1993). A Text Book of Silviculture, International Book Distributors, Dehradun.
4. Dwivedi, A. P. (1992). Principles and Practice of Indian Silviculture, Surya Publication.
5. Champenan, G.W. and Allan, T.G. (1978). Establishment Techniques for Forest Plantation F.A.O Forestry Paper No.8. F.A.O Rome.
6. Pradip Krishan (2013). Jungle trees of central India. Penguin Book distributors, India.

FUNDAMENTALS OF SOIL SCIENCE

CR: 4+2

Composition of earth's crust, soil as natural medium for plant growth, major components of soil, Soil minerals formation. Weathering of rocks and minerals-weathering factor, physical-Chemical-biological weathering and procedure of soil formation. Physical properties-bulk density, soil porosity, soil structure, soil consistency, plasticity. Soil organic matters and litter decomposition, pH, nutrient availability and absorption, soil buffering capacity, Soil water forms- soil moisture, wilting point- field

BL
26/11/18
Gaj
26/07/18

capacity- moisture, water holding capacity, Soil orders- land capability classification. Problem of salted, saline, permeable, Boulded and sandy soils.

Forest soils Vs cultivated soils. Soil colloids and exchange phenomena. Essential nutrient elements occurrence, availability and their functions. Diagnosis of nutrient deficiencies-visual symptoms, soil fertility evaluation methods. Site productivity and nutrient cycling in forest soils. Forest soil environment-distribution of various microorganisms, rhizosphere and phyllosphere concept. Mineral Transformation-carbon cycle, N₂-cycle, P-cycle, S-cycle. Bio-fertilizers -their importance. Nitrogen fixation-Rhizobium-tree legume symbiosis, Frankia - non-legume symbiosis, asymbiotic and associative N₂ fixation. Mycorrhizal types, biology and importance with specific relevance to tree used crops.

PRACTICAL

Identification of rocks and minerals; Collection and preparation of soil samples, soil analysis for moisture, color, bulk density, organic matter, pH, EC, Textural analysis.

Study the forest soil profile. Determination of available N, P & K content of soil, basic sterilization techniques, culturing and maintenance of micro organism occurring in soil, staining methods, study of decomposition of forest litter by CO₂- evolution method, preparation and inoculation technique for mycorrhiza and biofertilizers.

Suggested Readings:

1. Arntson, K.A. Forest Soils, (1977). IBD Publisher, Dehradun.
2. Gale, M.R. Forest Soil Research, (2006). IBD Publisher, Dehradun.
3. Drury, N.C and Weil, R.R.(2009), Nature and properties of Soil. Printice Hall of India.
4. Biswas, T.D. and S.K. Mukherjee (2001). Text book of soil Science. Tata Mc. Grew Hill, Publishing Co., New Delhi.
5. Wild, A. (1988) Soil conditions and plant growth. 11th edition, ELBS, London.
6. Mark Ashman and Geeta Puri (2008). A clear and concise introduction to soil science. Wiley-Blackwell publishers.
7. A.K.Kolay (1997) Basic concepts of Soil science. Wiley Estam Ltd.
8. Das, D.K (2013) Introductory Soil Science. Kalyani publishers.
9. Havlin J.L. and Tisdale S.L. (2013). Soil fertility and Fertilizers. Amazon.com
10. Halvin J and Pearson (2005). Soil fertility and fertilizers: An introduction to nutrient management. Printice Hall of India.
11. Biswas, T.D. and S.K. Mukherjee (1992). Text book soil fertility. Tata Mc. Grew Hill, Publishing Co., New Delhi.

Abinash
26/07/18
SS Singh
26/7/18

12. Black, C.A. (1993). Soil fertility evaluation and control. Lewis publishers, London.

13. Kanwar, J.S. (1976). Soil Fertility -- Theory and practice ICAR publication, New Delhi.

BASIC MATHEMATICS

CR: 4

Complex numbers, conjugate of complex numbers, properties of Complex numbers, modulus, geometrical representation of Complex numbers, Polar form, square root and cube root of a complex numbers, cube root of unity, Arithmetic progression, geometrical progression, binomial theorem for positive index. Measurement of an angle in radian and degree and its problems, trigonometric ratio and its problems related to them, addition, subtraction and product formula, Height and distance. Coordinate of point, distance between two points, coordinate of a point dividing the line joining two points in m:n ratios, mid-point, centroid, area of a triangle and quadrilateral. Matrices: addition, subtraction, multiplication of matrices, transpose adjoint and inverse of a matrix. Determinants and its properties. Measure of central tendency, Measure of dispersion and correlation. Surface Areas and Volumes: Introduction, Surface area of a Combination of Solids, Volume of a Combination of Solids, Conversion of solid from one shape to another, Frustum of a Cone.

Suggested Books:

1. Agrawal, R. S. (2012) Elementary Mathematics. Kalyani Publishers, New Delhi.
2. NCERT, Elementary Mathematics.
3. Hall and Knight: Higher Algebra, Book place, New Delhi.

ENGLISH COMMUNICATION

CR: 4

Introduction: Theory of Communication, Types and modes of Communication, Language of Communication: Verbal and Non-verbal (Spoken and Written) Personal, Social and Business, Barriers and Strategies, Intra-personal, Inter-personal and Group communication, Speaking Skills: Monologue, Dialogue, Group Discussion, Effective Communication/ Mis- Communication, Interview, Public Speech. Reading and Understanding: Close Reading, Comprehension, Summary Paraphrasing, Analysis and Interpretation, Translation (from Indian language to English and vice-versa), Literary/Knowledge Texts, Writing Skills: Documenting, Report Writing, Making notes, Letter writing

Suggested Readings:

1. Fluency in English - Part II, Oxford University Press, 2006.
2. Business English, Pearson, 2008.
3. Language, Literature and Creativity, Orient Blackswan, 2013.
4. Language through Literature (forthcoming) ed. Dr. Gauri Mishra, Dr. Ranjana Kaul, Dr Brati Biswas

SEMESTER - II

INTRODUCTORY BOTANY

CR: 4+2

Introduction to Botany and general classification of plants. Morphology of different parts of typical flowering plant. Structure and types of plant tissues internal structure of dicot, and monocot stems, root and a typical leaf. Significance of life cycles with special reference to alternation of generation in Nostoc, Rhizopus, Funaria, Adiantum, Pinus and in a flowering plant. Importance of plants in relation to environment.

Water relation in plants. Absorption of water, ascents of sap. Stomata, structure, mechanism of opening and closing of stomata, guttation, transpiration, factors affecting transpiration. Photosynthesis, its importance and factors affecting it. Photorespiration. Mechanism of Respiration and factors affecting it. Phyto hormones and their role in plant growth.

PRACTICAL

Morphological studies of root, stem, leaf and flowers. Studies of permanent slides of histology and anatomy. General survey of the local vegetation. A field trip during the semester. Osmosis- endo and exo-osmosis demonstration, Plasmolysis- demonstration, Transpiration rate, Measuring the rate of photosynthesis in plant species.

Suggested Readings:

1. Shiva, M.P. A Handbook of Systematic Botany. (1986). IBD Publisher, Dehradun.
2. NCERT. A textbook of Botany.
3. Strasburger, Schenck, Noll, Fritz, Karsten and Lang, W. H. (2010). A textbook of Botany. Academic Press, New York.
4. Singh, V and Jain D.K. (2013) Biology. Nageen Prakashan Pvt Ltd. Meerut, India.
5. Singh Pande Jain (2002). A textbook of Botany. Rastogi publications, Meerut, India
6. Taiz, L., Zeiger, E., Ian M. Moller and Angus Murphy-Sixth ed. (2015). Plant Physiology and Development. published by Sunderland: Sinauer Associates
7. Taiz, L. and Zeiger, E. (2010). Plant Physiology. Sunderland: Sinauer Associates.
8. Verma V. (2009) Textbook of Plant Physiology. Ane books Pvt. Ltd. New Delhi.
9. Salisbury, F and Ross Cleon (1988). Plant Physiology. Oxford and IBH, publishers.
10. William G. Hopkins and Norman P A Haier (2008). Introduction to plant physiology. Published by John Wiley and sons inc.
11. Majumdar (dr) Manisha (2011) Plant physiology. E-book on www.bookrix.com.

Shivan
26/07/18
26/7/18

12. Kramer, P.J and Kozlowski, T.T. (1980) Physiology of trees. Mc-Graw Hill Book Company, New York.
13. Kramer, P.J and Kozlowski, T.T. (1979) Physiology of Woody Plants. Academic press, New York.
14. Larcher, W. (1980) Physiological Plant Ecology. Springer -Verlag, New York.

FOREST ECOLOGY AND BIODIVERSITY CONSERVATION CR: 4 + 2

Concept of ecology, levels of biological organization, Ecosystem structure and function. Population ecology and its importance in forest management, plant community structure, Ecological succession, Biodiversity; conservation measurement of diversity and diversity indices. Biodiversity hotspots and biogeographic zones of India. Principles of conservation, Conservation' – efforts in India and worldwide. Rangeland ecology, importance of rangeland, Indian rangelands status and management. Rangeland inventory, rangeland improvement.

PRACTICAL

Study of Forest composition; Phytosociological study. Measurement of diversity of plants in a nearby forest; Study of succession in field and water bodies; Visit to different ecosystems. Identification of grasses. Rangeland inventory making. Determination of carrying capacity of rangelands, Indicator of heavy grazing.

Suggested Readings:

1. Mishra, R. (1968) Ecology Wisk Book Oxford and JBH Publishing Co, Calcutta.
2. Odum, E.P (1983), Basic Ecology, Saunders College Publishing, Holt Saunders, Japan.
3. Odum, E.P. (1983) Fundamentals of Ecology, Natraj Publisher, Dehradun
4. Kumar and Asija. Biodiversity – Principles and conservation. Published by Updesh Parohit for Agrobios, Jodhpur, India.
5. Ashok Malik (2008) Dynamics of forest ecosystems. Today and Tomorrow publishers, New Delhi.
6. Vijendra Das, LD (1998). Forage crops. International Book Distributors, Dehradun.
7. Singh, J. S., Singh, S. P. and Gupta, S. R. 2014. Ecology environmental science and conservation. S, Chand publication.

FUNDAMENTALS OF WILDLIFE CR: 4 + 2

Introduction: Definition of wildlife, free living, captive, domesticated and feral animals. Justification of wildlife conservation, uses, values and negative impact of wildlife. Zoogeographic regions and biogeography.

Etivah
Wadhwa
28/07/18
S Singh
8/8
5/11/18
Chakraborty
26/7/18

of the world. India's uniqueness in biodiversity, reasons and causes of wildlife depletion. Biogeographic classification of India. Status and distribution of wildlife in India. Scientific and common names of important mammals, birds and reptiles. Rare, endangered and threatened species of mammals, birds and reptiles of India. Agencies involved in wildlife conservation, Govt. and NCO's, BNHS, WWF, Indian Board for Wildlife, CITES. Biological basis of wildlife management. Basic requirements of wildlife – food, water, cover and space, limiting factors. Wildlife ecology: Relevance of basic ecological concepts such as food chain, food web, ecological pyramids, habitat, ecological niche, carrying capacity, density, prey-predator relations and population dynamics.

PRACTICAL

Identification and study of wildlife in a nearby zoo. Bird watching. Observe and prepare the list of butterfly in the campus. Preparation of inventory of an area.

Suggested Readings:

1. Dwivedi A P (2009). Managing wildlife of India. International Book Distributors, Dehradun, India.
2. Singh S K (2009). Textbook of wildlife management. Today and Tomorrow publishers.
3. Aaron, N.M. (1973). Wildlife ecology. W.H. Freeman Co. San Francisco, U.S.A.
4. Anon, (1990). Collection and preservation of animals. Zoological Survey of India.
5. Rajesh Gopal (1992). Fundamentals of wildlife management. Justice Home, Allahabad, India.
6. Robert, A.W. (1979). The ecology and evolution of animal behavior, Good Year Pub. Co. California, U.S.A.
7. Robert, G.H. (1978). Wildlife management. W.H. Freeman and Co., San Francisco, U.S.A.

ENVIRONMENTAL STUDIES

CR: 4

Introduction to environmental studies; Multidisciplinary nature of environmental studies; Scope and importance; Concept of sustainability and sustainable development. Ecosystems: Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. a) Forest ecosystem b) Grassland ecosystem c) Desert ecosystem d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries). Natural Resources Renewable and Non-renewable Resources: Land resources and land use change; Land degradation, soil erosion and desertification. Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations. Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state). Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies. Biodiversity and Conservation: Levels of biological diversity: genetic, species and ecosystem diversity; Biogeographic zones of India;

SEMESTER - III

FOREST MENSURATION

CR: 4 + 2

Introduction, definition, objectives and scope of forest mensuration. Units of measurement, standards of accuracy implied in their expression. Accuracy, precision and Bias. Measurement of single tree - objectives, standard rules governing measurement at breast height. Measurement of tree diameter and girth using rules, callipers and tapes. Height measurements - direct and indirect methods. Height measuring instruments, errors in height measurement. Tree form and method of studying forms. Measurement of cross sectional area, basal area and leaf area. Measurement of volume of trees. Preparation of volume tables, and its classifications. Calculation of log volume and sawn timber. Stand growth site quality, stand structure, yield tables and preparation of yield tables. Biomass measurement. Determination of age of trees. Tree growth measurements, objectives of increment, determination of increment, stump analysis, sicut analysis and increment boring. Measurement of volume and yield of plantation area/stand. Forest inventory.

PRACTICAL

Units of measurement and their uses. Instruments used in forest mensuration and their working principles, pertaining to tree height, diameter, basal area, bark thickness and crown measurements. Measurement of bark thickness, bark volume, bark area and crown parameters.

Suggested Readings:

1. Chaturvedi, A.N. and L.S. Kanna (1982). A handbook on Forest Mensuration. International Book Distributors
2. Avery, T.E. (1967). Forest Measurements. Mc Graw Hill Book Company, New York.
3. Hamilton, G.L. (1984). Forest Mensuration Handbook. Periodical Expert Book Agency.
4. Hinch, B., C.I. Miller and T.N. Beers (1982). Forest Mensuration. The Ronald Press Company, New York.
5. Maslekar, A.R (1990). Foresters Companions. Jagal Kishore and Co. (Publn. Div.), Dehra Dun.

CYTOGENETICS AND PLANT BREEDING

CR: 4 + 2

Plant cell: its structure and function. Cell reproduction, mitosis, meiosis and its significance. Nucleus, chloroplast and mitochondria. Chromosome its structure and function. Chromosomal aberration. Polyploidy.

Linkage and crossing over. Mendel's principles of heredity. Deviation from mendelian inheritance, pleiotropy, threshold characters, co-dominance, chromosome theory of inheritance, gene interaction,

Chavhan
WASH
26/07/18
SSingh
26/7/18

multiple alleles, Sex determining factors, sex linked inheritance and characters, Cytoplasmic inheritance and maternal effects, Chemical basis of heredity, Structure of DNA and its replication, RNA: its structure and function, Mutation and its classification.

Plant breeding, its aim and objectives, modes of reproduction, methods of breeding, selection types in importance.

PRACTICAL

Preparation of slide showing various stages of mitosis. Preparation of slides showing various stage of meiosis. Testing the viability and germination of pollen grains. Solving the problems based on Mendelian laws, floral morphology.

Suggested Readings:

1. Peasad, G. (1998). Introduction to Cytogenetics. Kalyani publishers New Delhi, India
2. Singh, P. (2005). Elementary of Genetics. Kalyani publishers Ludhiana, India
3. Zobel, B.J. and J. Talbert. (1984) Applied forest tree improvement. John Wiley & Sons, New York.

FOREST MANAGEMENT

CR: 4+2

Introduction: Definition and scope of forest management. Peculiarities of forest management. Principles of forest management and their applications. Objects of management, purpose and policy. General definitions: management and administrative units, felling cycle, costing section. Definition, Scope and classification of Silviculture System Clear felling systems Shelter wood system Selection system Accessory systems. Coppice system. Choice of silviculture systems. Cult selection system in Bamboo. Rotations: definition, kinds of rotations, choice of rotations, length of rotations and conversion period. Increment - definition & types, CAI -MAI relationship. Growing stock: concept and definition determination of growing stock, density, quantity and increment. Normal forest: definition and concept. Even aged and uneven aged models. Normal growing stock in regular, shelter wood system & selection

Diya
26/7/18

Cesha
26/7/18

systems. Yield- Sustained and progressive yield concept and meaning. Yield regulation - general principles of yield regulation in even aged and uneven aged forest crops. Working Plan: definition, objects and necessity, preparation of working plan. Joint forest management concept and methodology. Criteria and Indicator for sustainable forest management.

PRACTICAL

Visit to forest department and courts to observe working procedures. Study of working plans of the forests. Learning of preparation of working plan for one of the area. Estimation of MAI and CAL. Fixation of rotation for species. Perform a survey of forest area & chalk out a plan for Silviculture management. Study of vegetation features in G.G.V. campus. Drawing of silvicultural treatment map.

Suggested Readings:

1. Ram Prakash. Forest management, (2006) IBD Publication, Dehradun .
2. Osmani, F.C. Management of Forests, (1984) IBD Publication, Dehradun .
3. J B Lal (2007).Forest Management: Classical Approach and Current Imperatives. Natraj publishers, Dehra Dun.

5. Khanna, L. S. (1984) Principles and Practice of Silviculture, Khanna Bhanda, Dehra Dun. P. 476.
6. Champenan, G.W. and Allan, T.G. (1978) Establishment Techniques for Forest Plantation F.A.O Forestry Paper No.8, F.A.O Rome
7. David M. Smith. (1989) The Practice of silviculture. IBD Educational Pvt. Ltd, Dehradun, India.

ETHNOFORESTRY

CR: 4+2

Forest and tribes- their relationship, Major tribes in India and Chhattisgarh. Forest ecosystem and cottage industries. Role of tribes in forest protection, development and conservation. Tribal welfare and social forestry, Tribal and co-operative movements. History of tribal welfare and administration, forest & tribes, Seed and biofuels, Herbal medicines in ethnomedical practices, Edible wild fruits, Wild mushrooms, Natural dyes, Tasar cultivation, Economic uses of grasses, Non wood forest products. Ethnobotany & sustainable management.

PRACTICAL

Morphological description and identification of various medicinal plants. Collection of medicinal plants and plants part from natural habitats. Survey and study of nursery techniques of medicinal plants. Harvesting, drying, grading, storage and processing techniques. Study of plants parts used in drugs

Signature
28/07/18

4. C.M. Cotta (1996) Ethnobotany: Principles & Applications, John Wiley and Sons Ltd.
5. V.P. Agrawal (2002) Forest in India, Oxford and IBH publishers.
6. Ashok Ranjan Basu & S. Nijhavan (1985) Tribal Development Administration in India. Mittal publications.

NURSERY PRACTICES AND PLANTATION MANAGEMENT CR: 2 + 4

Nursery, introduction, objectives and scope, types of nursery, choosing nursery site, design and layout of the nursery, preparation of nursery beds, producing plant from seed, seed handling, dormancy and treatments, methods of sowing, time and season, potting mixtures, transplanting of young seedlings, plant containers, compost and mulches, nutrient and soil management, disease and pest control, sale and marketing.

Plantation: traditional and high tech plantation, layout of nursery design, different types of pits, site selection, calculation of plant requirement, pit filling, nutrient and pest management, post plant care, tree architects.

Practical

Site selection and its assessment, preparation of different types of nursery bed, study of plant containers, seed treatment, seed sowing, preparation of potting mixtures, application of mulches, application of weedicides, Compost preparation, Tools and instruments, nursery record. Assessment of plantation site, visit of nursery and plantations, pruning methods in newly and old plantations, fertilizer and weed management practices, Marketing management of nursery grown seedlings.

Suggested Readings:

1. Keats C Hall. 2003 Manual on nursery practice. Forest Department, Jamaica. E book
2. Pawar Penkaj 2007. Practical Manual of plantation forestry. Scientific publisher, Jodhpur
3. Sharma and Singh NP, 2011. Soil and orchard management. Daya Publishing House, Delhi
4. Luna RK. 2006. Plantation forestry in India. International book distributor, Dehradun India.

SEMESTER – IV

FUNDAMENTALS OF WOOD SCIENCE

CR: 4 + 2

Introduction to Wood. Secondary growth in woody plants. Mechanism of wood formation. Formation of early and late wood, growth rings, transformation of sapwood to heartwood. The macroscopic features of wood, bark, sapwood, heartwood, pith, wood rays, resin or gum-canals. Cell inclusions. Physical properties of wood; colour, hardness, weight, texture, grain, lusture etc. Mechanical properties of wood i.e. modulus of elasticity, ultimate stress, fiber stress at elastic limit, important factor influencing strength properties. Chemistry of wood and wood components. Wood water relationship. Abnormalities in wood: deviation from typical growth forms (leaning, bending, crook, fork, and buttress), grain deviation, false and discontinuous growth rings. Reaction wood, compression wood and tension wood. Disruption of continuity of inner wood, shakes, included bark, resin pockets, pith flecks, knots (live and dead).

PRACTICAL

Study of gross features of different types of wood; straight interlocked, spiral and wavy grain, texture, lusture, etc. Study of anatomical features of different types of wood pores /vessels. Study of wood rays and their types Study of non-porous woods, their physical and anatomical description Study of cell inclusions in wood. Estimation of moisture content and density of wood.

Suggested Readings:

1. Anonymous. (1976) Indian forest utilization. Volume I and II ICFRE Publication, Dehradun.
2. Mehta, T.(1981) A handbook of forest utilization. Periodical Expert Book Agency, Delhi. 298 p.
3. Rao, K.R, and Juneja, K.B.S.(1992) Field identification of 50 important timbers of India. ICFRE Puhli. Dehradun.
4. Sharma, L.C. (1977)Development of forests and forest based industries, Bishen Singh Mahendra
5. Pal Singh, Dehradun. Trotter, H (1940) Manual of Indian forest utilization. Oxford University Press, New Delhi.
6. Trotter, H. (1982) Indian forest utilisation, Forest Research Institute and Colleges, Dehradun.
7. Terry Porter (2006) Wood Identification and Use.Guide Master Craftman publications.

NURSERY MANAGEMENT AND COMMERCIAL FORESTRY

CR: 4 + 2

Propagation concept of plants, definition, methods and importance. Site selection, planning and layout of nursery area. Types of nursery, types of nursery beds, preparation of beds. Presowing treatments.

Sharma
24/7/16
16
Singh
26/7/16

Methods of seed sowing, Pricking, Watering methods, weeding, hoeing, fertilization, shading, root culturing techniques, lifting windows, grading, packaging, Storing and transportation. Type and size of containers. Merits and demerits of containerized nursery. Preparation of ingredient mixture. Vegetative propagation techniques - macro and micropropagation. Nursery practices for some important tree species. Origin, distribution, general description, phenology, silvicultural characters, regeneration methods, silvicultural systems and economic importance of the following conifer and broadleaved tree species of India. Conifers, *Pinus roxburghii*. Broad leaved species: *Tectona grandis*, *Shorea robusta*, *Acacia nilotica*, *Dalbergia sissoo*, *D. latifolia*, *Eucalyptus spp.*, *Albizia lebbek*, *Albizia procera*, *Azadirachta indica*, *Mulbaca indica*, *Santalum album*, *Terminalia spp.* and *Bamboo spp.*

PRACTICAL:

Preparation of production and planning schedule for bare root and containerized nurseries. Nursery site and bed preparation. Pre-sowing treatments. Sowing methods of small, medium and large sized seeds. Pricking and transplanting of pricked out stock within nursery in transplant beds. Preparation of ingredient mixture. Filling of containers. Visit to different nurseries. Study of morphology and phenology of tree species growing in the area. To study quality characters of nursery planting stock.

Suggested Readings:

1. Kumar, V. (1999) Nursery and plantation practices in forestry, Scientific publication, Jodhpur.
2. Chaturvedi, A.N. (1994) Technology of forest nurseries, Khanna Bandhu, Dehradun.
3. Duryea, M. L. and Landis, T.D. (1984) Forest nursery manual: Production of bare root seedlings, Martinus Nijhoff, The Hague.
4. F.A.O (1978) Establishment techniques for plantations, F.A. O. Publication, Rome, Italy.
5. Kumar, V. (1999) Nursery and plantation practices in Forestry, Scientific Publication, Jodhpur.

APPLICATION OF REMOTE SENSING AND GIS IN FOREST AND WATERSHED MANAGEMENT

CR: 4 + 2

Introduction of Remote Sensing, World Satellite system, Energy sources and radiation principals, EMR and Spectrum concept, Atmospheric windows, Interaction of EMR with Earth surface features, spectral signatures, SAR Interferometry, Fraction of absorbed photosynthetically active radiation. Basics of GIS, components, application and advantages, GIS software used, Data Image Processing concept, Data analysis, data output in GIS. Global Navigation Satellite System concept, Basic information on vegetation indices (RVI, NDVI, PVI, SAVI and LAI), different vegetation parameters for Watershed Management, Plant species specification, DEM creation and Soil mapping methods, Topographical character analysis concept in forest and watershed. Conceptual knowledge of use of remote sensing in

6. Sharma, M.K.(1986) Remote Sensing and Forest Surveys, International Book Distributors, Dehra Dun

NON WOOD FOREST PRODUCTS AND UTILIZATION

CR: 4 + 2

Introduction of Non Wood Forest Products (NWFP) importance and scopes, Canes and bamboos, Medicinal plants, Gums and resins, important gum yielding plants, Resins and Oleoresins, their formation in plants and its uses, Tendu leaves- sources, collection and processing, Sericulture and lac culture, Sustainable management of NTFP through community involvement, Dependency of forest dwellers on NTFP in economy, Potential and challenges of non timber economic growth of country, Scenario of NTFP obtained from forests of Chhattisgarh (Central India).

Practical

Visit to nearby forests to study important NTFP yielding plants. Study of canes and bamboos and their sources. Study of gums and resins and their collection. Visit to Herbal Gardens and herbaria to study medicinal plants. Study of plants yielding drugs, Visit to nearby extraction units, Visit of sericulture and lac cultivation farms. Tendu patta area and interaction with forest dwellers to study the economy of rural people.

Suggested Readings:

1. Dwivedi, A.P. (1993) Forests - the non-wood resources, International Book Distributor, Dehradun, 352 p.
2. Taank P (2010) Forest product and their utilization. Today and Tomorrow publishers.
3. Mehta T (2012) A handbook of forest utilization. Today and Tomorrow publishers.
4. Gupta, T. and Guleria, A. (1982) Non-wood forest products in India: Economic potential. Oxford and IBH Publication, New Delhi. 147 p.

SEMESTER – V

WILDLIFE MANAGEMENT

CR: 4 + 2

Definition of wildlife, free living, captive, domesticated and feral animals, Zoogeographic regions and biomes of the world. Status and distribution of wildlife in India. Scientific and common names of common, rare, endangered and threatened species of mammals, birds and reptiles in India. Agencies involved in wildlife conservation, Govt. and NGO's. Justification of wildlife conservation, uses, values and negative impact of wildlife. Biological basis and history of wildlife management. Basic requirements of wildlife – food, water, cover and space, limiting factors. Wildlife ecology, Prey-predator relations and population dynamics. Zoning, tourism and multiple use in protected areas. Wildlife damage control: Mitigating human – wildlife conflict: fences, trenches, walls, lure crops, repellents, translocation and compensation. Captive wildlife: Zoos and safari parks. Captive breeding for conservation. Central Zoo Authority of India. Wildlife census: Purpose, techniques. Wildlife (Protection) Act, 1972. Protected areas –Sanctuary, National Park and Biosphere Reserves. Special projects for wildlife conservation. Project Tiger and Musk Deer Project. Conservation: Meaning, principles and strategies, in-situ and ex-situ conservation, conserving biodiversity.

PRACTICAL

Visits of wildlife sanctuary/ Tiger reserve. Bird watching, observe the butterfly population in the campus, Preparation of inventory of an area. Direct and indirect methods of studying food habits and behavior of different wildlife.

Suggested Readings:

1. Dwivedi A P (2009) Managing wildlife of India. International Book Distributors, Dehradun, India.
2. Singh S K (2009) Textbook of wildlife management. Today and Tomorrow publishers.
3. Aaron, N.M. (1973) Wildlife ecology. W.H. Freeman Co. San Francisco, U.S.A.
4. Anon, (1990) Collection and preservation of animals. Zoological Survey of India.
5. Rajesh Gopal, (1992) Fundamentals of wildlife management. Justice Home, Allahabad, India.
6. Robert, A.W. (1979) The ecology and evolution of animal behavior. Good Year Pub. Co. California, U.S.A.

WOOD TECHNOLOGY

CR: 4+2

Wood- macroscopic and microscopic features, wood as raw material, Merits and demerits of wood as raw material. Mechanical properties of wood like tension, compression, bending, hardness, impact resistance, nail and screw holding capacities. Suitability of wood for various uses based on mechanical and physical properties. Electrical and acoustic properties of wood. Wood seasoning, principles, types, merits and demerits- air seasoning, kiln seasoning and chemicals seasoning. Seasoning defects and their control. Wood preservation - Need, principles, processes, types of wood preservatives (Water soluble, oil based, etc.). Classification of timbers based on durability. Wood working and sawing doctrine. Manufacture, properties and uses of composite wood- plywood, fiber board, particle board and hard board. Improved wood-definition, types (impregnated wood, heat stabilized wood, compressed wood, and chemically modified wood). Destructive distillation of wood. Scarification of wood, production of wood molasses, alcohol and yeast. Nano Forestry:- definition, concept, scope, application and Techniques, Elemental composition of wood through nano particle. Significance of nano forestry.

PRACTICAL

Preliminary idea regarding conversion and saw milling. Seasoning of timber. Seasoning defects and their remedies. Woodworking, tools used and various stages and types of joints in wooden member, wooden fasteners, dowels, carving, sanding etc. Polishing and finishing of wood. Surface coating applications and wood primers. Wood preservatives. Chemicals used and methods of wood preservation and fire retardant treatments.

Suggested Readings:

1. Mehta, T.(1981) A handbook of forest utilization. Periodical Expert Book Agency, Delhi.
2. Anonymous. (1976) Indian forest utilization. Volume I and II ICFRE Publication, Dehradun.
3. Rao, K.R. and Juneja, K.B.S. (1992) Field identification of 50 important timbers of India. ICFRE Publi. Dehradun.

7. Hill Callum A S (2006) Wood modification: chemical thermal and other process. Today and Tommorrow publishers.

FOREST TREE SEED TECHNOLOGY

CR: 4 + 2

Seed formation in trees. Classification of tree seed. Seed structure and chemical composition. Seed germination, seed viability and factors affecting seed viability. Seed dormancy and pre- treatment of break down dormancy, determining optimal harvest maturity indices. Seed collection methods- equipments and planning, seed processing, seed extraction, drawing, cleaning, grading, treating.

20
@Shivani
Lashmi
26/7/18
Raj
26/11/18

PRACTICAL

Identification of seed tree species, seed maturity test, germination test, seed vigor and its measurement, visit to seed production areas and seed orchards.

Suggested readings:

1. Ram Prasad and A K Kandya (1995), Handling of Forestry seeds in India, Natraj Publication, Dehradun
2. Agrwal, P K and M Dadlani (1987). Techniques in seed scien and technology, South Asian Publishers, Delhi

METEOROLOGY AND CROP PRODUCTION

CR: 4 + 2

Meaning and scope National and International agriculture research institute in India. Agro-climatic zones of India and Chhattisgarh. Tillage, crops stand establishment, planting geometry and its effect on growth and yield cropping system, harvesting. Crop production of wheat, rice, sugarcane, pulses and oil seeds. Meteorology: weather and climate, micro-climate, weather elements, earth's atmosphere composition and structure, solar radiation, nature, properties, solar constant and energy balance, atmospheric temperature, factors affecting, horizontal and vertical distribution, variations and global warming, air pressure variations, wind factors, cyclones, and anticyclones, atmospheric humidity, vapour pressure and saturation, process of condensation, formation of dew, fog, mist, snow, rain and hail. Formation and classification of clouds, introduction to monsoon, basics of weather forecasting.

PRACTICAL

Study of Tillage implements, practice of ploughing, practice of puddling, study of seeding, equipments. Different methods of showing, study of manures, fertilizers and green manure crops/seeds.(Including calculation). Study of intercultivation implements and practice, practice of methods of fertilizers applications in ongoing field operations. Site selection for agromet observatory, measurement of temperature, measurement of rainfall, measurement of evaporation, measurement of atmospheric pressure, measurement of sunshine duration and solar radiation, measurement of wind direction and speed and relative humidity. Study of weather forecasting and synoptic chart.

BASIC CONCEPTS OF HORTICULTURE AND LAND SCAPING CR: 4+2

Horticulture: definition, component and importance, Nursery management practices, vegetable gardens, Nutrition and kitchen gardens landscape garden, establishment of orchard high density and meadow orchard- principles, planning and layout, precision farming of fruit, planting system and planting densities. Vegetative propagation techniques- budding, grafting, cutting, IPM in horticulture. Principles and methods of pruning and training of fruit crops, Use of growth regulators in horticulture, weed management, cropping systems, intercropping, multi-storeyed cropping. Tree based cropping system.

PRACTICAL

Feature of orchard, planning and layout of orchard, tools and implements, layout of nutrition garden, preparation of nursery beds for sowing of vegetable seeds, digging of pits for fruit plants, planting system, Training and Pruning of trees, Preparation of fertilizer mixtures and field application, preparation and application of growth regulators, maturity standards, harvesting, grading, packaging and storage.

SEMESTER - VI

FOREST PATHOLOGY AND ENTOMOLOGY

CR: 1+2

Relation of plant pathology with forest pathology and other sciences, classification of tree diseases. General characteristics and reproduction of plant pathogens: fungi, bacteria, viruses. Important characters of ascomycetes and basidiomycetes, Dissemination and survival of plant pathogens. Concept of tree disease and types of wood decay.

Definition, importance and scope of Forest Entomology. Classification of forest pests: types of damages and symptoms; factors for outbreak of pests.

Symptoms, etiology and control of diseases/disorders and insect pests of important tree species (Teak, *Dalbergia*, *Eucalyptus*, Sal, and *Acacia*) Fungicides, methods of their application. Principles and techniques of Integrated Pest Management in forests.

Symptoms, etiology and management of diseases of important tree species like Teak, *Dalbergia* sp., *Acacia* spp., Sal, Pines, Deodar, *Eucalyptus*. Types of wood decay, Principles of disease management. Fungicides and their use in nurseries and plantation.

PRACTICAL

Study of different pathological instruments, collection, observation and preservation of diseased specimen and observation of other pathogenic structure: microscopic characters of pathogen (fungi, Bacteria) preparation of culture media, isolation and sub culturing of pathogens; methods of inoculation and Symptom, sign and diagnosis of tree disease.

Study of different types of insects and their collection. Study of insecticides and their formulations, plant protection appliances; Study of insect pests of forest seeds; Study of insect pests of forest nurseries; Study of insect pests of standing trees, freshly felled trees and finished products; Visit to forest nurseries and plantations.

Suggested Readings:

1. Bakshi, B.K. Forest Pathology. (1976) Principles and Practices in Forestry. Controller of Publications, New Delhi.
2. Khanna, L.S. (1984) Forest Protection, Khanna Bandhu, Dehra Dun.

AGROFORESTRY

CR: 4+2

Indian agriculture- structure and constraints. Land use definition, classification and planning. Agroforestry- definition, aims objectives and need. Traditional Agroforestry systems: Taungya system, Shifting cultivation, Wind break, Shelterbelts, Homestead gardens, Alley cropping, high density short rotation plantation systems, silvicultural woodlots/energy plantations. Classification of agroforestry system-structural, functional, socio-economic and ecological basis, Multipurpose tree species and their characteristics. Tree architecture, canopy management- lopping, pruning, pollarding and hedging. Diagnosis and design. Agroforestry systems in different agroclimatic zones, components, production and management techniques. Tree-crop interface. Economics of agroforestry systems. People participation, rural entrepreneurship through agroforestry and industrial linkages. Analysis of fodder and fuel characteristics of tree/shrubs.

PRACTICAL

Study characteristics of trees/shrubs/grasses for agroforestry, Volume and biomass estimation, Crown measurement, light interception and moisture measurement in agroforestry systems. Litter estimation and nutrient analysis, soil analysis, quantification of fertilizer doses, Annual crops/grass growth measurements and yield estimation carbon storage assessment.

Suggested Readings:

1. Dwivedi, A.P. (1992) Agroforestry principles and practices. Oxford and IBH Publication Co., New Delhi.
2. Chundawat D.S and Gautam S.K (2010) Textbook of agroforestry. Oxford and IBH publishing co pvt. Ltd.

FOREST ECONOMICS

CR: 4 + 2

Basic concept of economics, Nature and scope of economics and its relationship with other sciences, Types of goods, Concept and types of demand, law of demand, measures of demand elasticity, Concept and types of supply, law of supply, measures of supply elasticity, Types and theory of utility, Diminishing law of utility, equimarginal utility and Hicks-Allen approach for determining consumer equilibrium, Concept of revenue, Factors of production, their definition and characteristics, Law of diminishing marginal returns, Market - its classification and price determination under different market situations, Theory of consumption, Ricardian theory of Rent, Marginal productivity theory of wages, liquidity preference theory of interest, Marginal productivity theory, risk taking and uncertainty bearing theories of profit, National income and its concepts, Concepts and types of inflation.

Suggested Readings:

1. Edwin S. Mills (1975) Economic Analysis of Environmental Problems, New York: Columbia University Press
2. Fisher, A.C (1979) Resource and Environmental Economics, New York: John Wiley & Sons.
3. Orris C. Herfindahl (1969) Natural Resource Information for Economic Development, Baltimore: The Johns Hopkins University Press

FOREST TREE IMPROVEMENT AND BIOTECHNOLOGY

CR: 4 + 2

Reproduction in trees, Pollination in trees, Inbreed and outbreed population in forest trees, Genetic variability and its role in tree improvement, Qualitative and quantitative traits in forest trees, Heritability, genetic advance, genetic gain, combining ability and their application, Geographic variation: Provenance, seed source, race, Genetic, environmental and phenotypic expression of trees, Plus tree selection, progeny trials, Forest Genetic Resources and its Conservation, Plant tissue culture - culture media and its formation, cell/tissue culture, haploid culture, basics of Genetic Engineering- Vectors: plasmid, bacteriophage and cosmid, Genetic code, Genetic Engineering, Methods of gene transfer: direct and indirect genetic engineering, gene cloning and polymerase chain reaction, Recombinant DNA Technology, Role of Genetic Engineering in Forest Tree Improvement

Handwritten signatures and dates:
25
26/07/18
26/07/18
26/07/18

PRACTICAL:

Floral biology & phenological observations in some important species. Estimation of pollen viability. Different breeding methods flowchart. Species and provenance selection techniques. Vegetative propagation techniques and tree improvement. Estimation of phenotypic and genotypic coefficient of variation. Exercise in plus tree selection. Protocol and preparation of culture medium, Preparation of stock solutions. Sterilization techniques, preparation of culture medium for establishment of explants of forestry plants, multiplication of shoots, and callus culture.

Suggested Readings:

CARBON FORESTRY AND GLOBAL CLIMATE CHANGE CR: 4 + 2

Forests, Carbon and global climate. Forests and global carbon cycle. The key components of Forest Carbon: Carbon organic & inorganic, Carbon Source, Carbon Flow, Carbon Flux, Carbon Sink, Carbon Offset, Carbon Fertilization, Carbon footprint, Carbon Capture and Sequestration(CCS), Impacts of stand management on tree carbon stocks, Carbon in Woody debris and litter, Bio Soil – a new forest soil survey. Trees and Forests as collectors of carbon. Forest operations effects on carbon flux.

Signature: [Handwritten signature] 25 [Handwritten signature] [Handwritten signature]
26/7/18 26/7/18

The dynamics of carbon accumulation in tropical and temperate forests. Forest Soils as Carbon Reservoirs. Carbon Trade, Carbon Budget, Carbon Marketing, Carbon Dioxide Equivalent. The Potential Contribution of Indian Forests in carbon forestry. Carbon in Wood Products, Tree species wise Database for carbon stock. Carbon neutrality, carbon offset and carbon trading schemes. Forest Carbon management, Social Value Of forest Carbon. Global Climate Change: Science and Politics, Earth reservoirs: the basics, Climate change adaptation and mitigation. Mechanisms (CDM and REDD+), natural GHG effects, climate change: models, theories, facts and politics, Multilateral Agreements on Climate Change

PRACTICAL

Estimation of carbon content (organic/inorganic) in a wood, soil, litter and other forest based products. Sequestration of carbon in harvested wood products, Estimation of carbon flux, and CCS of forest trees/stands. Preparation of carbon inventories of different forest trees/stands. Establishment of forest carbon database, Survey to study the political/social context of carbon forestry. Biodiversity, migration and climate change assessment in different forest areas

Suggested Readings:

COMMUNITY FORESTRY

CR: 4+2

Introduction to the history and evolution of community forestry, Linkage between community forestry and natural resource management, forest societies, interactions between forests and people, importance of forests in traditional farming systems, livestock economy and forests, social and cultural factors of forest management, forest conflicts: wildlife and human conflicts, peoples movement in forest conservation like Chipko Movement, Gender dimension of forest management, tribals and forests, community management and sustainable livelihood strategies, forests and food security, eco-tourism and community development, Forest rights, customary rights of people, community participation, Joint Forest Management, global environmental change and land use; dams, forests and resettlement of tribals and non-tribals.

Practical

Case study of tribal's rehabilitation from National parks, dams, Study of role of community in ecotourism, Study of challenges faced by community for managing forest, Study of scared grooves, Various techniques of improving community participation.

Suggested readings:

1. Annamalai R. 1999. Participatory Learning Action and Microplanning for JFM. Dean SFRC, Coimbatore.
2. FAO. 1978. Forestry for Local Community Development. FAO Publ.
3. Shah SA. 1988. Forestry for People. ICAR.

SEMESTER - VII

BIOSTATISTICS

CR: 4+2

Definition and application of statistics, types and source of data, classification and tabulation of data, frequency distribution, graphical representation of data, (Bar diagram, pie chart, histogram, frequency polygon) measures of central tendency (mean, median, mode) measures of Dispersion (range, standard deviation, Mean deviation, Quartile deviation, variance, coefficient of variation), Probability, Test of significance: basic concepts, (Z- Test, χ^2 -Test, t-Test, F-test,), regression, Correlation : (scatter diagram, correlation co-efficient, its properties).

PRACTICAL

Histogram, Frequency polygon, Bar chart, pie Chart, Measures of central tendency: Mean median and mode for raw and grouped data. Construction of frequency distribution table and its graphical representation. Measures of dispersion: Range, mean deviation, Quartile deviation and standard deviation for raw and grouped data. Paired 't' test, Chi-square test for contingency tables and theoretical ratios Correlation and linear regression.

Suggested Readings:

1. Kenneth N.Berk(1998). Introductory Statistics, www.amazon.com
2. Arora P N (2003) Biostatistics, Himalayan publishers.
3. Marcello Pagano and Kimberlee Gauvreau (2008) Principles of Biostatistics, John and Wiley sons Ltd.

FOREST SURVEYING AND ENGINEERING

CR: 4+2

Engineering survey, scope and types of surveying, chain surveying, types and instrumentation traversing, triangulation, survey stations, base line, check and tie lines, ranging of survey lines, offsets and their types, chain of slopy grounds, chaining across obstacles, cross staff surveying, compass surveying, chain and compass traversing, magnetic and true bearings, prismatic compass, local attraction, Plane table surveying, plane table and its accessories, methods of plane table surveying, Leveling Instruments, total station survey, Contour surveying, Map and reading, its method and importance in Forestry.

Building materials- concrete, brick, cement, sand and strength and characteristics, site selection for building construction. Forest roads - alignment, construction and drainage, retaining walls, breast wall, waterways and culverts, bridges-types, selection of site, simple wooden beam bridges, check dams, spurs, farm ponds, earth dams.

3/11/18

WMM
26/07/18

29

SS Singh - 26/07/18
26/07/18

PRACTICAL

Chain survey, compass traversing, plane table surveying, Total Station survey, levelling, calculation of earth work for construction of fords, Earth dams, Alignment of forest roads, Design of simple wooden beam bridge, Design of retaining walls, Design of check dams.

Suggested Readings:

1. Ram Prakash (1983) Forest surveying, International Book Distributors, Dehra Dun.
2. B. C. Punmia (2005) Surveying, Firewall Media,
3. W. Schofield and M. Beach (2007). Engineering Surveying, British Library Cataloguing in Publication Data
4. Masani N J (2006) Forest engineering, Natraj publishers.
5. Michal & Ojha (1992) Principles of Agricultural Engineering, Vol-I & Vol-II, Kalyani publishers.

FOREST POLICY LEGISLATION AND ENVIRONMENTAL ACT CR: 4+2

Origin of Forestry- Historical background and introduction of forest policies of India namely 1894, 1952 and 1988 to protect the Indian Trees, Indian forest Act 1927, Tendu patta (Vyapar Viniyaman) Adhiniyam 1964, Transit Rules 1951, Forest conservation Act 1980, Fixation of Rates of Timber and Other Produce, Biodiversity Act, Lak Vaniki Adhiniyam, Chhatisgarh Medicinal plant Act, Forest Rights Act 2006- Privilege concessions and Rights of forest dwellers.

PRACTICAL

Visit to different saw mill, High court, District Court and Lower Court, Tendu patta Collection center. Study the effect of mined out area on forest, forest depot.

Suggested Readings:

1. Fernandez, W. & Kulkarni (1986) - Towards a new Forest Policy, Natraj Publishers, Dehra Dun.
2. Forest Policy (1988), Government of India Publication, Delhi.
3. Indian Forest Acts with short Notes (1975), Allahabad Law Agency, Allahabad.
4. Podder Erai (2011) Forestlaw and policy in India, Today and Tomorrow publishers.
5. Khanna, L.S., Wildlife (Protection) Act 1972 as amended upto date with commentary, Khanna Hanu, Dehra Dun.
6. Negi, S.S. (1985), Forest Law, Natraj Publication, Dehra Dun.

WORLD FORESTRY SYSTEMS CR: 4+2

Geographical distribution of world forest and their classification, International and National Forestry Organizations, Critical examination of world forest resources, productivity potential and increment of world forests, Forest resources and Forestry practices in different regions of the world- North and South

Signature

Signature
26/5/18

30

Signature

Signature
26/5/18

America, Europe, Africa, China, Japan, Russia, South East Asia and Australia. Forest development and economy, forest based industry of the world. Recent trends in Forestry development in the world.

PRACTICAL

Plot the different biomes of the world map. Study about the different Biogeographic regions of India & plot them on a map. Study of distribution of forest resources of India. Plot the different hot spots of India on a map. Study of different hot spots of the world & plot it on a map.

Suggested Readings:

1. Champion and Seth (1968) Forest Types of India. Natraj publishers.
2. V.P. Agrawal (1985) Forestry in India. Oxford and IBH publications, New Delhi
3. M.P. Shrivastava (1997) Introductory to Forestry. www.amazon.com
4. Negi, S.S. (1998) World Forest Systems. Natraj Publishers.

FUNDAMENTALS OF EXTENSION EDUCATION

CR: 4 + 2

Extension education: Meaning, definition, nature, scope, objectives, principles, approaches and history. Forestry extension: process, principles and selected programmes of leading national and international forest institutes. People's participation in forestry programmes. Motivation of women community, children, youth and voluntary organizations for forestry extension work. Rural Development: meaning, definition, objectives and genesis. Transfer of technology programmes like lab to land programme (LLP) national demonstration (ND). Audio-visual aids: importance, classification and selection. Programming planning process - meaning, scope, principles and steps. Evaluation: meaning, importance and methods. Scope and importance of Participatory Rural Appraisal (PRA) & Rapid Rural Appraisal (RRA). Management and administration: meaning, definition, principles and functions. Concepts of human resource development (HRD), rural leadership.

PRACTICAL

Visit to study the structure, function, linkage and extension programmes of ICFRE institutes/voluntary organization/mahila mandal, village, panchayat, state dept. of forests/All India radio (AIR). Exercises on distortion of message, script writing for farm broadcast and telecasts, planning. Preparation and use of NPVA like poster, charts, flash cards, folder etc. and AVA like OHP and 35mm slide projector transparencies. Identification of local leaders to study their role in extension work. Evaluation of some selected case studies of forestry extension programmes.

Suggested Readings:

1. FAO (1986), Forestry Extension Organisation, SLNo.68, FAO Publication, Rome, Italy.
2. FAO, Planning Forestry Extension Programs, FAO, Bangkok, Thailand.

Handwritten signatures and dates:
W.S.A. 26/10/18
S. Singh - 26/10/18
S. Singh - 26/10/18

3. Information Kit, International Institute of Rural Reconstruction, Silong, Philippines.
4. Research and Extension, Common Wealth Science Council, London, U.K.
5. DESAI, R.C. (1939), Farmers Societies and Agricultural Development, Natraj Publication, Dehra Dun.
6. FAO (1987), Forestry Extension Methods, SLNo. 80, FAO Publication, Ciraacali, Rome, Italy.
7. Supe S V (2009) A textbook on extension education, Agrotech publishing academy, Jodhpur.
8. Jha and Sharma P K (2001) Manual of forestry extension education, Today and Tomorrow publishers.

ENTREPRENEURSHIP DEVELOPMENT

CR: 4 + 2

Entrepreneurship Development, Concept of entrepreneurship entrepreneurial and managerial characteristics managing an enterprise, motivation and entrepreneurship development, Entrepreneurship development programme, SWOT analysis, Government schemes and incentives for promotion of entrepreneurship, Export and import policies relevant to Forestry sector, Venture capital, Contract farming and joint ventures, public private partnership, Social responsibility of business, Assessing overall business environment in Indian economy, Overview of Indian social, political and economic systems and their implication for decision making by individual entrepreneur, Globalization and emerging business / entrepreneurial environment.

Communication Skills: meaning and process of communication, Verbal and non verbal communication; listening and note taking, writing skills, oral presentation skills, field diary and lab record; indexing, footnote and bibliographic procedures, Reading and comprehension of general and technical articles, precise writing, summarizing, abstracting, individual and group presentation, public speaking, group discussion, Organizing seminars and conferences.

Suggested Readings:

1. O.P. Dharma & O.P. Bhainagar (1987) Education & Communication for Development, Oxford University Press, New Delhi
2. G.L. Ray (2011) Extension Communication and Management, Kalyani publications.
3. A.S. Sandhu (2004) A Text Book of Agricultural Communication, Kalyani publications
4. Bilhuti Bhusan Mohanty (1962) A Handbook of Audio Visual Aids, Kitab mahal pvt ltd Allahabad.

Handwritten signatures and dates:

SEMESTER - VIII

❖ SOCIO-ECONOMIC SURVEY- VILLAGE ATTACHMENT CR: 08

Data collection with respect to village profile in respect of socio-economic and cultural status, farm technology used etc. Bench mark survey of plant resources (cropping pattern, yield system etc). Schedule development, tabulation, analysis and preparing plan of work. Understanding local Forestry and other village level institutions (Panchayat, village forest community, corporations, youth/women groups etc.). People's participations in development programmes with special reference to Forestry. Exercise on the use of extension methods and teaching aids for transfer of technology.

❖ FORESTRY OPERATIONS (WORKING EXPERIENCE) CR: 08

Visit to modern forest nurseries, Herbal garden and watersheds. Study the felling and logging operations, timber lots and important industrial products. Study working plan. Enumeration, volume and yield calculation and component history file. Study the CAT (Catchment area treatment) plan and FDA (Forest Development Agencies). Use of Forestry equipments/instruments. Study the regeneration and management of important Forestry tree species. Sample plots, layout studies, stump analysis, preparation of local volume table.

❖ FOREST INSTITUTES AND INDUSTRIAL VISIT/ TRAINING CR: 08

- Study the nature of forest based industries
- Raw material- Collection and processing of raw material.
- Production and management process.
- Marketing and financial management.
- Visits of nearby forestry institutions/ organizations

Handwritten signatures and dates:

06. Assignment	-	05 Marks
Total	-	40 Marks

- Forest & Industrial visits/ Training, Forestry Operation (working experience) and Socio economic survey – village attachment will be evaluated by one external examiner from the outside of the Vishwavidyalaya and two Internal Examiners from the Department.
- Student project will be evaluated by a panel of two Departmental teachers.
- Practical examination for each class will be evaluated by two teachers of the Department.
- Minimum passing marks for each theory paper will be 40 %.
- Minimum passing marks for each Student project, practical, training programme, attachment programme, Village surveys etc. will be 40%.

SEMESTER-I

PAPER I: SILVICULTURE

CR-4 (3+1)

Objective

To provide knowledge about Forest ecosystem concept, stand dynamics forest succession, productivity and vegetation forms and natural regeneration of tree species.

Theory

Principles of Silviculture, Forest structure and their components, Forest ecosystem concept, Stand dynamics-forest succession, competition and tolerance, classification of world's forest vegetation, Forest types and their distribution, Ecophysiology of tree growth, effects of radiation and water relationship, mineral nutrient and temperature, Bioclimate and microclimate effect, Natural regeneration of important forest tree species (*Acacia nilotica*, *Cedrus deodara*, *Dalbergiasisoo*, *Tectonagrandis*, *Gmelinaarborea*, *Shorea robusta*, *Eucalyptus spp.*, *Bamboo* and *Pinusroxburghii*), Intermediate treatments, Artificial regeneration, Intensive studies pertaining to important commercial species, Advanced and modern nursery tools & techniques.

Practical

Acquaintance with various technical terms of silviculture, Study of forest composition, Recording the observations on shoot development, growth rings, crown development, leafing, flowering, and fruiting in (*Acacia nilotica*, *Cedrus deodara*, *Dalbergiasisoo*, *Tectonagrandis*, *Gmelinaarborea*, *Shorea robusta*, *Eucalyptus spp.*, *Bamboo* and *Pinusroxburghii*), Study of site factors like climatic, edaphic, physiographic and biotic, Study of natural regeneration, Afforestation and Reforestation success, Laying out of nursery bed for sowing, Classification of world's forest vegetation.

Suggested Readings

- Dwivedi AP. 1992. *Agroforestry: Principles and Practices*. Oxford and IBH.
- Dwivedi AP. 1993. *A Text Book of Silviculture*. International Book Distributors, Dehradun.
- Khanna L.S. 1996. *Principle and Practice of Silviculture*. International Book Distributors.
- Smith DM, Larson Be, Ketty MJ & Ashton PMS. 1997.
- Jha, L. K. 2014. *Advances in Agroforestry*. Today & Tomorrow's Printers and Publishers New Delhi.

PAPER II. FOREST BIOMETRY, SURVEYING & ENGINEERING Cr.4 (3+1)

Objective

To develop understanding of students about tree measurements, forest inventory, forest survey and yield concepts.

Theory

Measurements of tree diameter, girth, height, form Factor. Estimation of volume, quarter girth formula, estimation of tree age, increment, growth and volume table. Yield of individual tree and forest stands. Forest inventory, sampling methods adopted in forestry, random and non random sampling, point and crown sampling method, measurement of stand density. Forest Surveying: methods, Different methods of chain, plane table and compass surveying. Maps and map reading. Basic principles of Forest Engineering, building materials (cement, sand and concrete), Roads-alignment, component, types of roads, Bridges; General principles, objectives, types, simple design and construction of timber and other bridges.

Practical

Measurements of height, girth, diameter of trees. Calculations of volume of felled as well as standing trees. Volume table preparation, Application of sampling procedures, Handling of GPS. Use of different methods of surveying chain compass and plain table.

Suggested Readings

- Bena Singh 2011. *A Survey of the Forestry Research*, Vista International Pub.
Chaturvedi AN & Khanna LS. 1994. *Forest Mensuration*, International Book Distributor, Ram Parkash, 2009. *Forest Surveying*, Khanna Bandhu.
Harry G. Champion and S.K. Seth. 2005. *A Revised Survey of the Forest Types of India*, Natraj Publication,
McGraw-Hill. Simmons CEO 1980. *A Manual of Forest Mensuration*, Bishen Singh Mahender Pal Singh, Dehradun.
Ram Prakash 1983. *Forest engineering*, International book distributors.
Sharpe GW, Hendee CW & Sharpe WE. 1986. *Introduction to Forestry*, McGraw-Hill Publ.

PAPER III: FOREST MANAGEMENT, REMOTE SENSING & GIS Cr.4 (2+1+1)

Objective

To provide knowledge to students about forest management through Remote Sensing and GIS technique.

MSingh
29/6/15

29/6/15

29/6/15

Theory

Principles of forest management, Development of forest management in India, Concept of Normality, Normal Forest, Causes of abnormality in forest management Sustainable Forest Management, Rotation: Meaning and types, Increment, Types of increment, Yield: Types of Yield, Yield regulation in regular forest, yield regulation in irregular forest Management. Units: Working circles, felling series, cutting sections, coupes, periodic blocks and felling cycles. Silviculture system: Definition and types, Bamboo forest management and Working Plan prescriptions, Ecosystem management, Site quality, Stand density, Criteria and Indicators.

Remote Sensing definition, scope, source of energy and interaction with forest, EMR, Spectrum concept, radiation law, Orbit, Platform and Sensor, Multi-band concept, Satellite system and its use for forest mapping and management, GIS definition, hardware and software used, methods used in forest management, database and modeling concept, Imagery concept its interpretation and map preparation, LIDAR and RADAR concept for forest, Application of RS & GIS for forest management and planning, forest covers type discrimination and change detection analysis.

Practical

Study of various records and forms maintained in Forest division with regard to management of forests under their control. Study of working plans of the forests. Toposheet reading, determination of scale and height on toposheets, Introduction to different GIS software, conversion of file formats, image registration / geocoding, digitization, geo-referencing, Projection, File sub setting, mosaicing, unsupervised and supervised classification of forest, map preparation for forest cover, type, slope, LULC, fire, field visit for ground truthing.

Suggested Readings

- Burnough PA. 1990. *Principles of GIS for Land Resources Assessment*, Oxford & IBH Lileland T.M. Clarke, Keith. 2011. *Geographical Information System*, Prentice Hall.
- Dwivedi A.P. 1993. *A Text Book of Silviculture*, International Book Distributors, Dehradun.

Paper IV. FOREST ECOLOGY AND BIODIVERSITY CONSERVATION C&A (3+1)

Objective

To develop understanding of students about ecological aspects of forest resource and biodiversity conservation. Consequences of depleting biodiversity and sustainable use of biodiversity; Issues and challenges.

Theory

Forest ecology, forest community dynamics, forest community structure and function, ecology of forest landscape spatial heterogeneity; Hierarchy issues in ecology. Conservation of natural resources (Hotspot areas, Wildlife Sanctuaries, National parks, Biosphere reserve-terrestrial and aquatic, Botanical Gardens, Zoological Parks), Important Plant and wildlife ecological indicator species, endangered species, Coral reefs, Mangrove forest, Global warming and forests, Green House Effect, Ozone depletion and its consequences, Biodiversity Conservation laws and acts, Forest genetic resources of India Survey exploration and sampling strategies, Documentation and evaluation of forests genetic resources (FGR), *in situ* and *ex situ* conservation of genetic resources, Biological diversity and its significance to sustainable use, Handling and storage of FGR, Intellectual property rights, Quarantine laws and FGR exchange.

Practical

Study of forest community structure and its successional status, Estimation of productivity of forest ecosystem, Trip to different regions of the state to study forest vegetation, Collection and preservation of specimen, Identification of ecological indicator species, Methods of vegetation analysis, Measurement of biomass and productivity, Quantification of litter production and decomposition, Visit to National parks, Wildlife sanctuaries, Botanical gardens and arboreta.

Suggested Readings

- Anonymous. 2006. *Report of the National Forest Commission*. Govt. of India.
- Kumar Arvind. 2005. *Biodiversity and Conservation*, Today & Tomorrow's Printers and Publishers New Delhi.
- Dhyani SN. 1994. *Wildlife Management*, Rawat Publ.

Biosphere Series, The Parthenon Publ. Group.

Singh, M P et al. 2013. *Conservation of Biodiversity and Natural Resources*. Today & Tomorrow's Printers and Publishers New Delhi.

PAPER V. FOREST PROTECTION Cr-4 (3+1)

Objective

To provide knowledge to students about forest protection through diseases & pest management.

Theory

General concept of forest protection, Forest Fire, Wildlife damage in nurseries, plantations and their management, Weed problems in nurseries, plantations and their control, Adverse climatic factors, acid rains and air pollutants in relation to forest tree health.

Disease concept and disease cycle, Biodegradation of wood - microscopic and chemical effects of white rot, brown rot, soft rot and wood discoloration, Heart rots - factors affecting heart rots, damage caused, compartmentalization of decay in trees and management of heart rots, Role of mycorrhiza in tree health, Important diseases of forest trees- Teak, Sal, Shisham, *Acacia*, *Dalbergia*, Deodar, Pines and Casuarina, Insect pest of Sal, Teak, Shisham, Babool, *Albizia*, Pines, Deodar, Casuarinas and *Albizia*, Biological control of insect pests and diseases of forest trees, Nature of disease resistance, Molecular tools for developing disease resistance trees.

Practical

Collection, identification and preservation of important insect pests and disease specimens of forest plants, Preparation of culture media and methods of inoculation, Vegetative and reproductive study of pathogens, Detection of insect infestation and seed borne mycoflora, Assessment of losses due to diseases, insect pests etc. Fire control methods and devices, Familiarization with the meteorological and plant protection equipment, Application of pesticides and bio-control agents in the management of insect pests, weeds, diseases in nurseries and plantations, Extraction of spores of Vascular arbuscular mycorrhizal (VAM), fungi from soil and assessment of mycorrhizal root infection,

Suggested Readings

PAPER VI FOREST STATISTICS & RESEARCH METHODOLOGY CR.5 (3+1+1)

Objective

To provide exposure about methods of statistical analysis, design and sampling techniques.

Theory

Introductory: Statistics scales of measurement, concept of graphical, exploratory and inferential data analysis, important variables of forestry sector, Mean, Median, Mode and SD. Concept of Probability.

Correlation and regression: Simple, Rank, Partial, Multiple, intra-class correlations, Coefficient of determination, Linear and nonlinear regressions. Tests of significance - t, F, z, and χ^2 , testing significance of correlation and regression coefficients, analysis of variance (ANOVA) - one way and two way classification with single and more than one cell frequency. Design of Experiments, Principles of experimental designs, Completely Randomized Design (CRD), Randomized Block Design (RBD), Latin Square Design (LSD), Split Plot and Strip Plot Designs.

Practical

Fitting of probability distributions, Computation of correlations and regressions, Tests of significance - t, F, z and χ^2 , Laying out of designs in the field (i) Latin Square, (ii) Randomized Block design, (iii) Split plot design, (iv) Data analysis of the above designs.

Suggested Readings

- Forestry Statistics India-1996: Indian Council of Forestry Research and Education, 1999
Martin J. 1976. *Principles of Database Management*. Prentice Hall Paise UG & Sukhatme MU, 1978.

SEMESTER-II

PAPER I, FOREST POLICY, LAWS AND ENVIRONMENTAL LEGISLATION

Cr.4 (2+1+1)

Objective

To develop understanding of students about forest policy, laws and Environmental Legislation.

11/11/13
29/6/15
29/6/15

Handwritten signature and date: 29/6/16

Theory

Forest policy- Relevance and scope, National Forest Policy - 1894, 1952 and 1988. General principles of criminal law; Indian Penal Code, criminal procedure code; Forest laws, Indian Forest Act -1927, general provision and detailed study; Forest Conservation Act 1980, Wildlife Protect Act 1972. Important Forest Rules and Guidelines. Forest Right Acts, 2006. Chhattisgarh State Forest Acts and Rules. Important case studies and landmark judgments.

Practical

Visit to High Court, Lower Court. Visit to forest depot. Visit and study about crime cell of forest department.

Suggested Readings

- Chaturvedi A.N 2011. *Forest Policy and law*, Khanna Bandhu.
Indian Forest Acts (with short notes) 1975. Allahabad Law Agency.
Jha LK. 1994. *Analysis and Appraisal of India's Forest Policy*. Ashish Publ. House.

Prabhakar V.K., 2001. *Laws on Forests*, Anmol Publication.
National Forest Policy 1952. Ministry of Food and Agriculture, New Delhi.
National Forest Policy 1988. Ministry of Environment and Forests, New Delhi.
Sabaria, VB, 1989. *Wildlife Law in India*. Natraj Publ.
Sauram Bhat 2010. *Natural Resources Conservation Law*. Sage.
Negi SS. 1985. *Forest Law*. Natraj Publ.

PAPER II FOREST TREE IMPROVEMENT AND BIOTECHNOLOGY CR.4 (3+1)

Objective

To acquaint the students about general principles of tree breeding with examples of important trees.

Theory

General concept of forest tree breeding, tree improvement and forest genetics. Reproduction in forest trees. dimorphism pollination mechanisms. Pollen dispersion - distances, pollinators and their energetics. Attractants for pollinators. Pollen handling forced flowering for seed orchard manipulation. Pollination mechanisms. A Variation in trees importance and its causes. Natural variation as a basis for tree improvement. Geographic variations - Ecotypes, clines, races and land races. Seed, seed formation, dispersal, storage, stratification and seed dormancy. Selective breeding methods- mass, family, within

M. Singh
27.6.15

29/6/15

Handwritten signature and date: 29/6/15

family, family plus within family, Plus tree selection for wood quality. Progeny and clone testing. Seed orchards - type, functions and importance. Estimating genetic parameters and genetic gain. Heterosis breeding: inbreeding and hybrid vigour. Manifestation and fixation of heterosis. Species and racial hybridization. Indian examples - Teak, Sal, Shisham, *Eucalypta*, *Acacias*, Pines And Poplars. Polyploidy, aneuploidy and haploidy in soft and hardwood species. Induction of polyploidy. Hardy-weinberg law, null hypothesis, Wahlund's Principle.

Biotechnology in tree improvement. Mutation breeding. Tissue Culture, Micro-propagation, Genetic engineering, Transgenic plants, Molecular marker and its application in forestry.

Practical

Floral biology, modes of reproduction and modes of pollination in forest trees. Estimating pollen viability. Controlled pollination and pollen handling. Manipulation of flowering through hormones. Identification of ecotypes, races, and land-races in natural forest. Visit to species, provenance and progeny trials. Selection of superior phenotypes. Marking of candidate trees, plus trees and elite trees. Visit to seed orchards. Comparison of parents and their putative hybrids. Induction of polyploidy through colchicines treatment.

Suggested Readings

- Khan IM, 2014 Forest Biotechnology, Today and Tomorrow Printers and Publishers New Delhi.
Mundai AK & Gibson GL (Eds). 1997. *Forest Genetics and Tree Breeding*. CBS.
Surendran C, Sehgal RN & Paramathma M, 2003. *Text Book of Forest Tree Breeding*. ICAR Publ.

Zobel BJ & Talber J. 1984. *Applied Forest Tree Improvement*. John Wiley & Sons.

PAPER III: WOOD TECHNOLOGY AND NANO FORESTRY CR.4 (3+1)

Objective

To acquaint with the physical characteristics and strength properties of wood.

Theory

Wood as a raw material, kinds of wood : hard wood, soft wood, bamboos and canes. Merit and demerits of wood as a raw material. The physical features of wood. Mechanical properties of wood- tension, compression, bending, shearing, cleavage, hardness, impact resistance, nail and screw holding capacity.

29/6/15

29/6/15

Suitability of wood for various uses based on mechanical and physical properties. Electrical and acoustic properties of wood. Wood water relationship- shrinkage, swelling, movement, fiber saturation, equilibriums, moisture content. Wood seasoning, principles and types- air seasoning, kiln seasoning & chemical seasoning. Refractory classes of timber, kiln schedule, Seasoning defects and their controls. Wood preservation- needs, principles, process, types of wood preservatives (water soluble, oil based, etc.). Classification of timbers based on durability. Methods of preservation. Pressure methods- full cell process, empty cell process. Wood machining: Sawing - techniques, kinds of saws - cross cut edging, hand, circular and bow saws. Wood working, tools used in wood working (parting, slicing, shaping, measuring and marking tools). Dimensional stabilization of wood by surface coating method, bulking method. Impregnation of resins and polymers. Nanotechnology potential in forest product industry, Nano cellulose technology. Basic concepts of Nano forestry, trials, techniques and significance.

Practical

Determination of wood density, study of thermal, electrical and acoustic properties of wood. Determination of tensile and bending properties of wood. Determination of moisture content and swelling coefficients of different woods. Comparative studies on air and kiln dried woods. Analysis of decayed wood for physical and chemical parameters. Treatment of wood with different types of preservatives.

Suggested Readings

PAPER IV. WILDLIFE BIOLOGY AND CONSERVATION (3+1)

Theory

Introduction/Conservation ethics- Definitions, Values, Zoological classification. Sign and symptoms. Animals behavior & adaptations, Wild life Ecology, Basic concepts, Wildlife habits and habitat. Wildlife Ecology: Wildlife habitat and component Wildlife conservation: Definition, Concept, significance. Wildlife conservation movement. Wildlife conservation in India, In-situ and Ex-situ wildlife conservation, Role of protected area in wildlife conservation, some rare and threatened wildlife species of world particularly India, special project for endangered species, Project tiger, Gir Lion Project, Crocodile Breeding Project, Wildlife Conservation organization- National and International.

Wild life management: Wild life management its scope as a natural resource, current status of wildlife management, Management of certain animals: small game management water fowl, Pigeon, aquatic animal, Reptile, Big game management, Tiger, Bear, Elephant, Rhinoceros, deer, Biological basis of management- animal population, shelter, food, WL Policy Legislation and administration policies and programmes, Wild life protection act 1972, wild life education, Age and Sex determination, Tiger census, Preservation of biological material, National Park and Sanctuaries of (C.G). Biotelemetry, Forensic Analysis.

Practical

Study of mammals birds and animals in university premises, Identification of pugmark, evaluation of Roosting cover in university premises, Plotting of National Park and Sanctuaries.

Suggested Readings

Agarwal, K.G., 2000. *Wildlife of India: Conservation and management*, Nidhi Publishers India.

PAPER V. FOREST SOILS AND WATERSHED MANAGEMENT CR.4 (3+1)

Theory

Definition and importance of forest soils; Origin, classification and nomenclature of soils; Soil profile; Soils of major forest biomes; Difference between forest soil and other arable soils; Important physical, chemical, and biological properties of forest soils; Forest soil survey; land use type and forest plantations; Forest-soil types; Silviculture practices and forest soils.

Organic matter content, litter decomposition and C:N ratio in forest soil; Forest soil fertility, nutrient management and biological nitrogen fixation; Management of forest nursery soil.

Soil degradation-problems and impact on forest ecosystems; Forest fire and soil resilience; Forest soil pollution, Characteristics, ecology and management of tropical forest soils. Problems and prospects in management of tropical dry and moistdeciduous forest soils.

Watershed management concept, Problems of land degradation, Soil and water conservation measures for arable and non-arable lands, Storage and recycling of water, Criteria for watershed size determination

Watershed work plan for degraded sites. Rehabilitation of degraded lands and prevention of natural hazards.

Practical

Determination of soil moisture, texture, porosity, bulk density, particle density and water holding capacity; Determination of pH, EC, organic C & N; Study of forest soil profile in field, Studies on nitrogen fixing and phosphorous absorbing microbes; Studies on fertilizers, biofertilizers and FYM uses in forest nursery, visits to nearby forest nursery and watershed areas.

Suggested Readings:

PAPER VI. FOREST PRODUCTS AND INDUSTRIES CR.4 (3+1)

Objective

The course will equip the students regarding wood based industries. How it is affecting the economy of the country such as match and splint, sports and pencil making, besides this wood extracts resins and gums, katha, tannins and various type of non timber products. Practical will make them aware regarding extracting method of different products of wood.

Theory

Importance of forest based industries in relation to Indian economy. Chemistry in relation to forest products.

Description of different forest based industries - paper and pulp, furniture, bamboos, sports goods, pencil making, match box and splint making, use of wood of lesser known forest species for commercial purposes.

Cell wall constituents, Chemistry of cellulose, starch, hemicelluloses and lignin. Extraneous components of wood - water and organic solvent soluble

Taping of oleoresin from major pine species. Types of the gums and their extractions (ambic, ghatti and tragacanth)

Recovery and uses of volatile oils, tannins, katha and catech. Nature and uses of important forest based dyes and pigments.

Practical

Determination of cell wall contents -- Hemicellulose and lignin. Extraction of essential oils, resins, tannins and gum. Characterization of pulp & rate of pulping. Identification and properties of wood and non wood products used for forest based industries. Visit to nearby forest based industries.

PAPER VII: ENVIRONMENT AND GLOBAL CLIMATIC CHANGES
CR-4 (3+1)

Objective

To develop understanding of students about environmental and climatic System. To develop understanding of students about global climatic changes and their effect on forest/aquatic ecosystems.

Theory

Environment: Definitions and concepts of environment components of atmosphere, hydrosphere, pedosphere, biosphere and their interactions. Biogeochemical cycle of green house gases, source and sinks.

Environment Pollution : Types of pollutions, methods of measurement of pollution, classification of pollutants, national and international Environmental standards of important pollutants.

Air pollution : Major pollutants and their sources. Ionizing radiation, monitoring of gaseous pollutants and particulate matter, Vehicular pollution, Biological abatement of air pollution, Development of green belt.

Water Pollution : Important pollutants source, impact of heavy metals, halogen and radio nuclides on aquatic flora and fauna. Treatment technologies for industrial effluents/wastewater. Monitoring water pollution and water quality standards.

Soil pollution : Heavy metal toxicity in soil, Impact of pesticides, industrial waste and fertilizers on soil physicochemical properties. Microbiological degradation of xenobiotics in environment.

Climate changes: Earth's climate systems, adaptability and vulnerability. A global perspective of climate change, global warming, green house gases, IPCC initiatives in climate change mitigation, various mitigation mechanism- Kyoto protocol- strategies. Impact of climate changes on Indian forest, adaptation of forest trees to climate change, case studies on the management of certain tree species in India.

Global Environmental Problems : acid rain, Eutrophication, Biomanipulation, Ozone depletion and UV radiation. Bioremediation of contaminated soils and waste lands. Environment Impact Assessment.

Practical

Impact of particulate matter on environment, Impact of coal mining on environment Impact of cement pollution in environment. Effect of effluent from several industries on environment. Reclamation of mining wastes with microorganisms. Bio-accumulation studies on metals by microorganisms. Assessment of environmental impact on polluted sites. Assessing the awareness of environmental regulation and control methods. Impact of power stations on plant, microorganisms, animals and soils ecosystems, EIA of polluted river ecosystem, Environmental Impact Assessment.

SEMESTER- III

SPECIALIZATION COURSES

Following two specialization courses will be offered to the students and students have to select only one specialization courses during the semester.

- A. FOREST GENETIC RESOURCES
- B. FOREST MANAGEMENT

A. FOREST GENETIC RESOURCES

PAPER I. BREEDING METHODS IN FOREST TREES Cr.4 (3+1)

Objective

To acquaint the students about the concepts of sub-selection, population structure for breeding and production, genetic testing and making designs.

Theory

Genetic constitution of tree populations, half-sib, full-sib family in trees. Hardy-Weinberg equilibrium, changes in gene frequency through selection, migration, mutation and population sizes.

Long-term and short-term breeding populations. Selective breeding methods- mass, family, within family, family plus within family. Grading system of plus trees in natural stands and plantations regression systems, mother tree selection, subjective evaluation, Selection for different traits.

Genetic testing programs - mating designs, complete designs - nested designs, factorial, single pair mating, full diallel, half diallel and partial diallel, incomplete pedigree designs - open pollinated mating and polycross mating.

Experimental designs in genetic testing. Selection for disease resistance, tolerance to herbicide, salt, metals, high and low temperature, water stress. Marker assisted selection. Breeding methods for wood quality, agroforestry, diseases and pest resistance, drought and

Mishra

salt resistance.

Tree improvement case histories. Calculating gene and genotype frequencies. Flow chart for different breeding methods.

Practical

Half-sib, full-sib family in trees. Grading system of plus trees in natural stands. Mating designs, complete designs - nested designs, factorial, single pair mating, full diallel, half diallel and partial diallel, incomplete pedigree designs - open pollinated mating and poly-cross mating. Selection for biotic and abiotic stresses.

PAPER II: FOREST TREES REPRODUCTIVE BIOLOGY AND SEED ORCHARDS CIC4 (3+1)

Objective

To impart the knowledge of reproduction in forest tree species and to understand the mechanism of breeding, sex expression, and seed orchard development

Theory

Importance and application of reproductive biology in tree breeding. Modes of reproduction: vegetative, asexual, sexual reproduction their breeding systems and sex expression. Monoecy, dioecy and its evolution. Out-crossing mechanism in forest trees. Environmental effects on sex expression. Floral biology. Initiation and development- Microsporogenesis, Megasporeogenesis, modes of pollination; Self

Handwritten signatures and dates: Singh 29/6/15, Singh 29/6/15, Lambhary 29/6/15.

and out-crossing. Fertilization in hardwood and softwood species. Embryo development, seed development, Seed dispersal and gene flow. Seed orchard need, establishment of seed orchard, hybrid and research seed orchard, selection and preparation of seed orchard site, isolation, orchard size, orchard design. Seed orchards – production and management, different types of seed orchards – SSO and CSO. Merits and demerits. Progeny testing and its importance. Pests and disease management. Importance of seed orchards in gene conservation. Seed production area- its production and management.

Practical

Sex expression in forest trees. Out crossing mechanisms in forest trees. Measurement of pollen flow in wind-pollinated and insect-pollinated species. Pollen viability and fertility. Seed dispersal mechanism. Visit and study of seed orchard design. Plant growth regulator application for flower induction. Study the intracross variation in floral and seed characters.

PAPER III. MOLECULAR GENETICS OF FOREST TREES

(CR-4 (3+1))

Theory

Genome: Nuclear Genome, Mitochondria Genome, Chloroplast Genome and Evolution of the three Plant Genomes. Transcription and translation of forest tree Genes. DNA replication. Genetic code. Gene expression. Regulation of Gene Expression. DNA damage, repair and recombination.

Genetic diversity/Genetic variation of forest trees: causes and advantages. Genetic characterization of forest tree species. Morphological, Biochemical and Genetic markers. Molecular markers: Dominant and codominant, Types of molecular markers: advantages and disadvantages. Techniques in molecular

genetics of forest trees: DNA isolation, DNA quantification, DNA restriction, Primer, gel electrophoresis, southern, northern and western blotting; nucleic acid hybridization; polymerase chain reaction, gene sequencing .
Polymorphism and its significance Calculation of genetic diversity within and between forest tree populations. Molecular markers and genome mapping. Application of molecular markers in forest tree improvement. Genomics of wood formation. Molecular genetics of cellulose biosynthesis.
Associate mapping through molecular markers. Social issues in molecular genetics. Bioinformatics.

Practical

Estimation of genetic diversity between/among forest tree populations through Morphological markers. Preparation of solutions for DNA isolation, Electrophoresis and PCR. Standardization of protocols for DNA isolation of different forest tree species. Standardization of working protocol for RAPD, ISSR and AFLP analysis. Estimation of genetic diversity between/within forest tree population through molecular markers.

PAPER IV: QUANTITATIVE GENETICS OF FOREST TREES

(CR 4(3+1))

Objective

To impart knowledge in the field of biometry as applied to breeding, population, provinces and making experience in forest genetics and tree breeding.

Theory

Historical aspects of quantitative genetics; multiple-factor-hypothesis. Population structure, mating systems.

Hardy-Weinberg equilibrium: properties and implications of equilibrium, influence of mutation, migration and selection. Random mating consequences in small populations. Random drift, inbreeding coefficient, rate of inbreeding.

Inbreeding in pedigree population, inbreeding coefficient under regular systems of inbreeding. Statistical parameters used in studying polygenic traits.

Testing and estimating: population mean and components of phenotypic value, breeding value, dominance, interaction and environment deviation. Models of gene action, significance of different genetic components, G x E component of variance.

Estimation of genetic components of variance through resemblance of relatives. Fisher's fundamental theorem on natural selection and its implications. Heritability-its estimation and significance.

Selection theory for a quantitative character. Prediction of selection response: patterns, asymmetry, and causes. Selection criteria and use of information from relatives. Correlation among characters, correlation response and indirect selection.

Effect of inbreeding on mean and variance. Heterosis and causes for heterosis in F1 and later generations. Combining ability effects, variances and selection for combining ability. Threshold characters.

Practical

Quantitative and qualitative character analysis in forest tree species. Phenotypic, genotypic correlations and path analysis of forest trees. Estimation of variance components from analyses of variance using

25

29/6/15

29/6/15

29/6/15

various mating designs of forest trees. Estimation of population value with respect to quantitative/qualitative traits. Multivariate analysis.

PAPER V: FOREST GENETIC DIVERSITY, CONSERVATION & ENVIRONMENTAL IMPACT CR 4(3+1)

Objective

To provide the students knowledge about the genetic diversity in forest tree species, their distribution, assess and analysis law and methodology of *in-situ* and *ex-situ* conservation.

Forest biodiversity: concept, levels and measurement. Forest genetic diversity: Values, Services and threats. Levels of Genetic Variation in Forest Trees. Characteristics of Forest Genetic Diversity: Interspecific and Intraspecific diversity, Ecotypes, Subspecies, Population, Metapopulation, Provenance, Land race, Cline. Dynamics of forest genetic diversity: Genetic erosion, Population bottleneck, Genetic drift, Selection, Migration and Mutation. Genetic diversity in natural forests. Natural and induced genetic diversity in forest tree species. Biodiversity In forests of India (Tropical and Temperate Forests). Hotspots of forest genetic diversity. Measurement of forest genetic diversity and diversity indices. Monitoring of forest genetic diversity: Documentation and evaluation. Climate change and forest genetic diversity.

SEMESTER- IV

This semester will have following training programmes.

1. Field Training (Attachment with State Forest Department for analysis of FGR & its distribution)
Specialization: Forest Genetic Resources (FGR)

27

Mangal
29/6/15

Sh
29/6/15

Handwritten signature and date: 29/6/15

Learn to make FGR inventory. Analysis of Provenance Variation. Identification of self and cross pollinating forest trees and its genetic diversity pattern analysis. Genetic diversity status on the basis of morphological markers. Population wise conservation priority zones of specific forest tree species. Species wise adaptability in the natural forest stands. Identification of plus tree and elite tree zones in forest. Flowering and seeding pattern of forest. Seed dispersal pattern and its influence on forest genetic resources. Identification of species wise seed production areas. Clone, seed, pollen and specimen collection. Identifying the factors which are threat to forest genetic diversity. Characterization of Genetic Potential against changing climate. Forest regeneration status. Making plans for long term and short term tree improvement programmes. Development of practical step guide to the in-situ conservation of FGR. Forest genetic resource management by forest department.

2. Industrial Training

Study the nature structure of Industrial Training and Business Organization; Raw material procurement and processing; Production, Marketing and Economics at Wood workshop and saw mills/wood seasoning and preservation treatment units/Pulp and Paper Industries/ Katha making industry/ Resin, Turpentine, Gums, Tendupatta, Chironji Industry; Herbal Pharmacies and other wood product industries.

3. Computational skills

Introduction to computers and personal computers. basic concepts (H/W, S/W, Input & Output Devices) operating system (Introduction of open source and closed source), DOS and Windows XP/7/8, introduction of programming languages, BASIC languages concepts basic and programming techniques, MS Office, Win Word, Excel, Power Point, MS Access. Introduction of Statistical & Remote sensing softwares. Introduction to Multi-Media and its application. Introduction to Internet,

4. Student Report

B. FOREST MANAGEMENT

PAPER I. FOREST RESOURCE ANALYSIS

CR.4 (3+1)

Objective

To develop understanding of students about the nature and importance of forest resources, their availability and management strategies.

Theory

Forest resources: wood produce and non-wood produce. Raw materials of forest origin for industries viz. paper and pulp, plywood and board, saw mills, furniture making, packing

28

Mishra
29/6/15

SK
29/6/15

Prakash
29/6/15

case, match splints, toys etc.

Minor forest products: edible products, fodder trees, shrub and grasses, bamboo and cane, medicinal and aromatic plants, oil seeds, gum & resins, fiber and florses, spices and miscellaneous products e.g. Katha, latex, insecticides, soap nuts, etc.

Animal products from forest - lac, honey, silk, fur, skins, tusks etc. Dependency of villagers/tribal on forest resources for different livelihood options.

Nature, scope and importance of forest resources in regional & national economy, nature, role and functions of forest based industries, reasons for resource degradation. Causes of low productivity of forest resources, remedial strategies, Trends in the production of important forest resources (wood and non-wood products). Government policies on forest resources.

Approaches to achievements under five year plans. Management strategies for improved production and consumption of forest resources.

Practical

Identification, nature and properties of different wood and non-wood forest resources. Techniques & methods of value addition to forest resources for other upgradation, Exercise for forest resource mapping and analysis.

Suggested Readings

Agricultural Production and Resource Use. Oxford Univ. Press.

PAPER II. PRODUCTION MANAGEMENT IN NURSERY AND PLANTATION

FORESTRY

CR.4 (3+1)

Objective

To develop understanding and management skills of the students in respect of commercial nursery production and plantation forestry.

Theory

Introduction to production theory, Production concepts, Resource-Product Relationship, Types and Kinds of Production Functions, Principles of resource allocation in nursery production, Resource combination and cost minimization; Resource allocation and enterprise combination. Derivation of cost and supply functions from production functions, Managing risk and uncertainty in nursery and plantation forestry.

Planning and Budgeting techniques applied in nursery production and plantation forestry.

Record book keeping system, Income and cash flow analysis. Principles of financial analysis, Investment analysis in plantation forestry, Determination of optimum rotation period.

Market structure, Functions, Channels, Marketing efficiency and marketing problems of nursery and plantation forestry.

Practical

Exercises on marginal analysis in nursery production, Exercises on investment analysis, Exercises on marketing channels, costs, margin and price spread for different nursery and plantation crops.

Suggested Readings.

Busby R.N. 1981. *Investment Appraisal in Forestry*. Forestry Commission Research Station, Surveys.

PAPER III. FINANCE AND MARKETING MANAGEMENT OF FOREST

RESOURCE SCR.4 (3+1)

Objective

To develop understanding of students about financial and marketing management tools as applied in forest resources.

Theory

Finance- definition, aims and objective; Goals of financial management, organization of finance in business firms; Working capital management; need, concepts and sources of working capital. Gross and net working capital; factors influencing working capital requirements. Importance and preparation of Financial Statements, Balance Sheet and Profit and Loss accounts. Sources of long term finance. Purpose and essentials of budgeting, important components of budget, preparation of budgets;

Market- concept, components and classification. Demand and supply and factors affecting the market. Simple market model and price determination: Market structure, conduct and performance. Market integration- meaning, types and effects of market integration. Marketing cost, margin and price spread- concepts and applications, Marketing efficiency- definition, IPRs and their implications in forestry. Marketing of wood and non-wood forest products.

Practical

Library review of studies in marketing and trade of national and international timber and non timber forest products. Analysis of price and market data of forestry products. Exercises on analysis of demand and supply of important forest products. Exercises on marketing channels, costs, margins and price - spread of important forest products. Case studies based on visits to selected markets, marketing institutions and forest based industries.

PAPER IV. TREE BUSINESS MANAGEMENT

CR.4 (3+1)

Objective

To develop understanding and management skills of the student with special reference to tree farm business management.

Theory

Tree Farm: concepts, present scenario, and business application. Relationship of farm sciences with other sciences. Types of tree Farm in India, nature, scope and function of farm business management. Principles involved in Tree farm management decision making. Law of diminishing returns, substitution law, cost and price principle, depreciation. Principles of farm planning and budgeting. Working out existing and alternative farm plans. Importance of farm records, types of physical and financial records, Farm business efficiency measures. Fundamentals of inventory Management of special farm projects like, nursery, plantations Teak, Eucalyptus, Bamboo, Sissoo, and Terminalia, sericulture. Farm labour and its problems. Labour efficiency measurement, work allocation, raising labour productivity, staff control, work progress charts, Farm capital and its problems, Farm machinery and its working principle, Field assessment for species selection and growth analysis of tree in the farm.

Practical

Visit of agricultural farm, plantations. Calculation of fertilizers and compost quantity in different tree farms. Formulation of farm budget, Cost of production, maintenance of single and double entry system of account, preparation of farm records, Farm tools and its use in tree farm.

Suggested Readings:

Bansal WJ & Oates WE. 1975. *The Theory of Environmental Policy*. Prentice Hall.

PAPER V. FOREST MANAGEMENT FOR ENVIRONMENT CONSERVATION CR.4

(3+1)

Objective

To develop understanding and management skills of the student with special reference to Environment conservation

Theory

Definition, concept and principle of sustainable forest management. Problems in modern forest management, ITTO's principles, Montreal Process, SFM within the context of climate change, Sustainable energy and NTFP management, Sustainable harvesting, Gender sensitization in SFM, Process flow for women involvement SFM, Concept of participatory development, Participatory management and key elements of processes for planning and implementation, monitoring and evaluation, Concept of PRA & RRA, techniques & tools of PRA, Importance of PRA, problems in PRA, RRA applications, Watershed Management: Concept, Scope, Importance and Principles of watershed management, Application of Remote sensing & GIS for sustainable forest management, Criteria and Indicators of SFM, Bhopal India Process, CAMPA, JFM, Assisted natural regeneration, Forest Certification, Concept of tree outside forest

Practical

Practice of participatory rural appraisal technique, Preparation of micro plan for sustainable forest management, Resource survey and preparation of resource map, Exercises on designing training program for sustainable forest management, Reading of watershed map: Region/Basin /Catchment/Watershed preparation of classification chart, Writing news items, success stories, leaflets, and folders for the SFM, Visual interpretation of imageries and preparation of land use land class classification, Digitization of raster data.

33

Handwritten signatures and dates: Singh 29/6/15, Singh 29/6/15, and another signature dated 25/6/15.

SEMESTER- IV

This semester will have following training programmes:

1. Field Training (Attachment with State Forest Department for analysis of Forest Management patterns & Management techniques)

Specialization: Forest management

Visit to modern forest nurseries, herbal gardens and watersheds. To study the medicinal and aromatic plants diversity, their conservation and domestication. Study the felling and logging operations, timber lots and industrially important products. Introduction to Working Plan, data generation-enumeration and volume/yield calculation. Writing of compartment history files. Study the catchment area treatment plant and FDA. Study the Regeneration and Management of regionally important forestry tree species. Laying out sample plots, stump analysis, preparation of local volume table and use of forestry field equipments/ instruments. Visit to National Parks, Sanctuaries and Bio-sphere reserves. Visit to ecologically degraded areas around cement plants, mined areas etc and study rehabilitation measures adopted. Visit to plantation site and data collection for its growth pattern and feasibility.

2. Industrial Training

Study the nature structure of Industrial Training and Business Organization: Raw material procurement and processing; Production, Marketing and Economics at Wood workshop and saw mills/wood seasoning and preservation treatment units/Pulp and Paper Industries/ Katha making industry/ Resin, Turpentine, Gums, Tendupatta, Chironji Industry; Herbal Pharmacies and other wood product industries.

3. Computational skills

Introduction to computers and personal computers, basic concepts (H/W, S/W, Input & Output Devices) operating system (Introduction of open source and closed source), DOS and Windows XP/7/8, introduction of programming languages, BASIC languages concepts basic and programming techniques, MS Office, Win Word, Excel, Power Point, MS Access, Introduction of Statistical & Remote sensing softwares, Introduction to Multi-Media and its application, Introduction to Internet.

4. Student Project

Sh
29/5/15

Computation of SGPA and CGPA

The UGC recommends the following procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e

$$SGPA (S_i) = \frac{\sum(C_i \times G_i)}{\sum C_i}$$

where C_i is the number of credits of the i th course and G_i is the grade point scored by the student in the i th course.

ii. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.

$$CGPA = \frac{\sum(C_i \times S_i)}{\sum C_i}$$

Where S_i is the SGPA of the i th semester and C_i is the total number of credits in that semester.

iii. The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

Illustration of Computation of SGPA and CGPA and Format for Transcripts

i. Computation of SGPA and CGPA

Illustration for SGPA

Course	Credit	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	8	3 X 8 = 24
Course 2	4	B+	7	4 X 7 = 28
Course 3	3	B	6	3 X 6 = 18
Course 4	3	D	10	3 X 10 = 30
Course 5	3	C	5	3 X 5 = 15
Course 6	4	B	6	4 X 6 = 24
	20			139

Thus, $SGPA = 139/20 = 6.95$

Illustration for CGPA

Semester 1	Semester 2	Semester 3	Semester 4	Semester 5	Semester 6
Credit : 20	Credit : 22	Credit : 25	Credit : 26	Credit : 26	Credit : 25
SGPA: 6.9	SGPA: 7.8	SGPA: 5.6	SGPA: 6.0	SGPA: 6.3	SGPA: 8.0

Thus, $CGPA = \frac{20 \times 6.9 + 22 \times 7.8 + 25 \times 5.6 + 26 \times 6.0 + 26 \times 6.3 + 25 \times 8.0}{144}$

144

= 6.73

ii. Transcript (Format): Based on the above recommendations on Letter grades, grade points and SGPA and CGPA, the HEIs may issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.
