Abstract

This study was aimed to study the teaching effectiveness of secondary school teachers under teaching background of fathers. The objective was to study and compare teaching effectiveness of secondary school teachers of Ranchi region and ascertain difference between teaching effectiveness of secondary school teachers with teaching background of fathers. Sample of study consisted of 74 secondary school teachers selected randomly furthermore it was also categorized by gender (male & female) of the selected teachers.

Keyword: Teaching Effectiveness, Secondary School Teacher, Teaching Background of Fathers.

Introduction-

Teacher plays an important role in shaping and moulding the habits, taste, manners and above all, the character of the students. The supreme task of the care and the guidance of the children have been entrusted in their hands. A good teacher is originally adaptable, forceful, healthy, honest, industrious, open minded, as well as well informed and progressive too. Recent findings suggest a business-like approach in the organization of class activities impartiality and willingness to adapt the class room situation, objectivity, resourcefulness and interest in teaching as the hallmark of a good teacher. So, in view of the above identification of a qualified,
