Introduction

Education is a powerful instrument of individual as well as national development. It makes us more aware and confident, provides scope to develop the inborn abilities through maximum freedom. It empowers mind that will be able to conceive good thoughts and ideas. It aims to give everyone a chance to learn including rural and urban areas and also for different types of children in our society including differentially, able children. There are many children who have special learning needs and these are addressed through special education. Special Education is instruction that is specially designed to meet the unique needs of children who have some kind of disabilities. It is the practice of educating students in a way that address their individual differences and needs. This process involves the individually planned and monitored arrangement of procedure, equipment and materials. 'Special education is in place to ensure that all students' educational needs are met and addressed properly. This means that additional services, support, programs, specialized placement or environments are supplied when necessary and at no cost to the parents (IDEA, 2016)'. The aim of special education is to ensure that students
